QUESTION 1

What type of data does data rights management (DRM) protect?

- A. Consumer
- B. PII
- C. Financial
- D. Healthcare

Correct Answer: A

DRM applies to the protection of consumer media, such as music, publications, video, movies, and soon.

QUESTION 2

Which protocol allows a system to use block-level storage as if it was a SAN, but over TCP network traffic instead?

- A. SATA
- B. iSCSI
- C. TLS
- D. SCSI

Correct Answer: B

iSCSI is a protocol that allows for the transmission and use of SCSI commands and features over a TCPbased network. iSCSI allows systems to use block-level storage that looks and behaves as a SAN would with physical servers, but to leverage the TCP network within a virtualized environment and cloud.

QUESTION 3

The GAPP framework was developed through a joint effort between the major Canadian and American professional accounting associations in order to assist their members with managing and preventing risks to the privacy of their data and customers.

Which of the following is the meaning of GAPP?

- A. General accounting personal privacy
- B. Generally accepted privacy practices
- C. Generally accepted privacy principles
- D. General accounting privacy policies

Correct Answer: C

QUESTION 4

In which cloud service model is the customer required to maintain the OS?

- A. IaaS
- B. CaaS
- C. PaaS
- D. SaaS

Correct Answer: A

In IaaS, the service is bare metal, and the customer has to install the OS and the software; the customer then is responsible for maintaining that OS. In the other models, the provider installs and maintains the OS.

QUESTION 5

Which of the following best describes data masking?

- A. A method for creating similar but inauthentic datasets used for software testing and user training.
- B. A method used to protect prying eyes from data such as social security numbers and credit card data.
- C. A method where the last few numbers in a dataset are not obscured. These are often used for authentication.
- D. Data masking involves stripping out all digits in a string of numbers so as to obscure the original number.

Correct Answer: A

All of these answers are actually correct, but A is the best answer, because it is the most general, includes the others, and is therefore the optimum choice. This is a good example of the type of question that can appear on the actual exam.
