QUESTION 1

What permissions are required for a marketer to send an email marketing message to a consumer in the EU?

- A. A prior opt-in consent for consumers unless they are already customers.
- B. A pre-checked box stating that the consumer agrees to receive email marketing.
- C. A notice that the consumer's email address will be used for marketing purposes.
- D. No prior permission required, but an opt-out requirement on all emails sent to consumers.

Correct Answer: A

QUESTION 2

A dynamic Internet Protocol (IP) address is considered personal data when it is combined with what?

- A. Other data held by the processor.
- B. Other data held by the controller
- C. Other data held by recipients of the data.
- D. Other data held by Internet Service Providers (ISPs).

Correct Answer: D

QUESTION 3

A company plans to transfer employee health information between two of its entities in France. To maintain the security of the processing, what would be the most important security measure to apply to the health data transmission?

- A. Inform the data subject of the security measures in place.
- B. Ensure that the receiving entity has signed a data processing agreement.
- C. Encrypt the transferred data in transit and at rest.
- D. Conduct a data protection impact assessment.

Correct Answer: A

QUESTION 4

SCENARIO

Please use the following to answer the next question:

Joe started the Gummy Bear Company in 2000 from his home in Vermont, USA. Today, it is a multi-billion-dollar candy company operating in every continent. All of the company's IT servers are located in Vermont. This year Joe hires his son Ben to join the company and head up Project Big, which is a major marketing strategy to triple gross revenue in just 5 years. Ben graduated with a PhD in computer software from a top university. Ben decided to join his father's company, but is also secretly working on launching a new global online dating website company called Ben Knows Best.

Ben is aware that the Gummy Bear Company has millions of customers and believes that many of them might also be interested in finding their perfect match. For Project Big, Ben redesigns the company's online web portal and requires customers in the European Union and elsewhere to provide additional personal information in order to remain a customer. Project Ben begins collecting data about customers' philosophical beliefs, political opinions and marital status.

If a customer identifies as single, Ben then copies all of that customer's personal data onto a separate database for Ben Knows Best. Ben believes that he is not doing anything wrong, because he explicitly asks each customer to give their consent by requiring them to check a box before accepting their information. As Project Big is an important project, the company also hires a first year college student named Sam, who is studying computer science to help Ben out.

Ben calls out and Sam comes across the Ben Knows Best database. Sam is planning on going to Ireland over Spring Break with 10 of his friends, so he copies all of the customer information of people that reside in Ireland so that he and his friends can contact people when they are in Ireland.

Joe also hires his best friend's daughter, Alice, who just graduated from law school in the U.S., to be the company's new General Counsel. Alice has heard about the GDPR, so she does some research on it. Alice approaches Joe and informs him that she has drafted up Binding Corporate Rules for everyone in the company to follow, as it is important for the company to have in place a legal mechanism to transfer data internally from the company's operations in the European Union to the U.S. Joe believes that Alice is doing a great job, and informs her that she will also be in-charge of handling a major lawsuit that has been brought against the company in federal court in the U.S. To prepare for the lawsuit, Alice instructs the company's IT department to make copies of the computer hard drives from the entire global sales team, including the European Union, and send everything to her so that she can review everyone's information. Alice believes that Joe will be happy that she did the first level review, as it will save the company a lot of money that would otherwise be paid to its outside law firm. The data transfer mechanism that Alice drafted violates the GDPR because the company did not first get approval from?

- A. The Court of Justice of the European Union.
- B. The European Data Protection Board.
- C. The Data Protection Authority.
- D. The European Commission.

Correct Answer: C

QUESTION 5

What is true if an employee makes an access request to his employer for any personal data held about him?

- A. The employer can automatically decline the request if it contains personal data about a third person.
- B. The employer can decline the request if the information is only held electronically.

- C. The employer must supply all the information held about the employee.
- D. The employer must supply any information held about an employee unless an exemption applies.

Correct Answer: D
