QUESTION 1

Which of the following entities would most likely be exempt from complying with the General Data Protection Regulation (GDPR)?

- A. A South American company that regularly collects European customers' personal data.
- B. A company that stores all customer data in Australia and is headquartered in a European Union (EU) member state.
- C. A Chinese company that has opened a satellite office in a European Union (EU) member state to service European customers.
- D. A North American company servicing customers in South Africa that uses a cloud storage system made by a European company.

Correct Answer: C

QUESTION 2

What is the main privacy threat posed by Radio Frequency Identification (RFID)?

- A. An individual with an RFID receiver can track people or consumer products.
- B. An individual can scramble computer transmissions in weapons systems.
- C. An individual can use an RFID receiver to engage in video surveillance.
- D. An individual can tap mobile phone communications.

Correct Answer: D

QUESTION 3

SCENARIO

WebTracker Limited is a cloud-based online marketing service located in London. Last year, WebTracker migrated its IT infrastructure to the cloud provider Azure, which provides SQL Databases and Artificial Intelligence services to WebTracker. The roles and responsibilities between the two companies have been formalized in a standard contract, which includes allocating the role of data controller to WebTracker. The CEO of WebTracker, Mr. Bond, would like to assess the effectiveness of Azure's privacy controls, and he recently decided to hire you as an independent auditor. The scope of the engagement is limited only to the marketing services provided by WebTracker, you will not be evaluating any internal data processing activity, such as HR or Payroll.

This ad-hoc audit was triggered due to a future partnership between WebTracker and SmartHome -- a partnership that will not require any data sharing. SmartHome is based in the USA, and most recently has dedicated substantial resources

to developing smart refrigerators that can suggest the recommended daily calorie intake based on DNA information. This and other personal data is collected by WebTracker.

To get an idea of the scope of work involved, you have decided to start reviewing the company's documentation and

interviewing key staff to understand potential privacy risks.

The results of this initial work include the following notes:

There are several typos in the current privacy notice of WebTracker, and you were not able to find the privacy notice for SmartHome. You were unable to identify all the sub-processors working for SmartHome. No subcontractor is indicated in

the cloud agreement with AmaZure, which is responsible for the support and maintenance of the cloud infrastructure. There are data flows representing personal data being collected from the internal employees of WebTracker, including an

interface from the HR system. Part of the DNA data collected by WebTracker was from employees, as this was a prototype approved by the CEO of WebTracker.

All the WebTracker and SmartHome customers are based in USA and Canada.

Which of the following issues is most likely to require an investigation by the Chief Privacy Officer (CPO) of WebTracker?

- A. Data flows use encryption for data at rest, as defined by the IT manager.
- B. AmaZure sends newsletter to WebTracker customers, as approved by the Marketing Manager.
- C. Employees\' personal data are being stored in a cloud HR system, as approved by the HR Manager.
- D. File Integrity Monitoring is being deployed in SQL servers, as indicated by the IT Architect Manager.

Correct Answer: B

Sending marketing communications such as newsletters to customers involves processing their personal data. It is important for WebTracker\'s CPO to investigate whether this processing is being done in compliance with applicable data protection laws and regulations. This may include verifying that customers have given their consent to receive these communications or that another lawful basis for processing their personal data exists.

QUESTION 4

Which privacy engineering objective proposed by the US National Institute of Science and Technology (NIST) decreases privacy risk by ensuring that connections between individuals and their personal data are reduced?

- A. Disassoc lability
- B. Manageability
- C. Minimization
- D. Predictability

Correct Answer: A

disassociability is a privacy engineering objective proposed by the US National Institute of Science and Technology (NIST) that decreases privacy risk by ensuring that connections between individuals and their personal data are reduced.

QUESTION 5

There are two groups of users. In a company, where one group is allowed to see credit card numbers, while the other group is not. Both are accessing the data through the same application. The most effective and efficient way to achieve this would be?

- A. Have two copies of the data, one copy where the credit card numbers are obfuscated, while the other copy has them in the clear. Serve up from the appropriate copy depending on the user accessing it.
- B. Have the data encrypted at rest, and selectively decrypt it for the users who have the rights to see it.
- C. Obfuscate the credit card numbers whenever a user who does not have the right to see them accesses the data.
- D. Drop credit card numbers altogether whenever a user who does not have the right to see them accesses the data.

Correct Answer: B

the most effective and efficient way to achieve this would be to have the data encrypted at rest, and selectively decrypt it for the users who have the rights to see it.
