QUESTION 1

DRAG DROP

Match the types of e-authentication tokens to their description.

Drag each e-authentication token on the left to its corresponding description on the right.

Select and Place:

E-Authentication Token		Description
Memorized Secret Token		A physical or electronic token stores a set of secrets between the claimant and the credential service provider
Out-of-Band Token		A physical token that is uniquely addressable and can receive a verifier-selected secret of one-time use
Look-up Secret Token		A series of responses to a set of prompts or challenges established by the subscriber and credential service provider during the registration process
Pre-registered Knowledge Token		A secret shared between the subscriber and credential service provider that is typically character strings

Correct Answer:

E-Authentication Token		Description
	Look-up Secret Token	A physical or electronic token stores a set of secrets between the claimant and the credential service provider
	Out-of-Band Token	A physical token that is uniquely addressable and can receive a verifier-selected secret of one-time use
	Pre-registered Knowledge Token	A series of responses to a set of prompts or challenges established by the subscriber and credential service provider during the registration process
	Memorized Secret Token	A secret shared between the subscriber and credential service provider that is typically character strings

QUESTION 2

DRAG DROP
