QUESTION 1

You are assigned to carry out and document a system and context delimitation for a software system that is to be developed. What diagram is least suited for the representation of the delimitation? (1 Point)

- A. Class diagram
- B. Use case diagram
- C. State diagram
- D. Context diagram with data flows

Correct Answer: C

QUESTION 2

In a meeting held with the goal of validating a set of requirements, two participants become involved in an in-depth discussion about the content of a requirement. One of the participants is of the opinion that the requirement must be realized as described, since the success of the product is otherwise jeopardized. The other party dissents and argues that this requirement cannot be realized technically as described. What is the best way for you to react to this situation? (1 Point)

- A. You note both arguments and let the project manager make the decision.
- B. You invite all stakeholders to a workshop and try to reach agreement.
- C. You prefer the second opinion since you believe that the discussion makes no sense if the requirement cannot be realized.
- D. You get together with the affected stakeholders and attempt to reach an agreement on this.

Correct Answer: D

QUESTION 3

For an interview, you have prepared a use case diagram for the system to be specified. You decide to talk through a use case in detail with the stakeholder. You receive very useful feedback which must now be documented. Which of the following means of expression is least suitable to document the details of a single use case? (1 Point)

- A. State diagram
- B. Activity diagram
- C. Natural language
- D. Context diagram
- E. Class diagram

Correct Answer: D

QUESTION 4

Validating requirements is one of the main activities of requirements engineering. Which four of the following techniques are suitable for requirements validation? (2 Points)

- A. Stakeholder analysis
- B. Walk through
- C. Ranking
- D. Monitoring
- E. Decomposition
- F. Apprenticing
- G. Generalization
- H. Validation by using an interface prototype
- I. Perspective-based reading
- J. Inspection
- K. Visualization

Correct Answer: BHIJ

QUESTION 5

As a requirements engineer, you deal with a diverse range of requirements. A template for natural language functional requirements can help you to formulate different forms of system activities in a more precise way. Which two kinds of system activities are among those supported? (1 Point)

- A. User interaction
- B. Technical requirement
- C. Quality requirements
- D. Independent system activity
- E. System requirement

Correct Answer: AD
