QUESTION 1

Choose below the best characterization of the difference between black-box testing and white-box testing

A. For black-box testing, the testers do not need to know the test object in advance

B. For white-box testing, the testers have to consult specifications and developers before running any tests

C. Black box testing uses static analysis. White box testing uses dynamic analysis

D. Black-box testing is based on the test basis documentation. White-box testing is based on an analysis of the code itself.

E. Black-box testing is based on an analysis of the code itself White-box testing is based on the test basis.

Correct Answer: C

QUESTION 2

Why is it important to select a test technique?

A. Test techniques define the number of regression cycles, which in turn impact the project schedule

B. Selecting the right test technique in a given situation increases the effectiveness of the test process by creating tests with higher chance of finding bugs.

C. The only way to test a software application is by using well proven test techniques.

D. There are usually too many test cases that may be run on a system. Test techniques help reduce the number of tests.

Correct Answer: D

QUESTION 3

A. Adjudicator

B. Moderator

C. Governor

D. Corrector

Correct Answer: B

QUESTION 4

![Pass2Lead](https://Pass2Lead.com)
A new testing tool has been selected for an organisation and a pilot project has successfully completed.

The next step is to deploy the tool within the organization.

What is a key success factor in tool deployment?

A. Estimate a cost-benefit ratio based on a firm business case

B. Determine whether benefits will be achieved at reasonable cost

C. Provide support for the test team using the tool

D. Assessment of organisational maturity, strengths and weaknesses

Correct Answer: A

QUESTION 5

Which of the following statements about estimation of the test effort is WRONG?

A. Effort estimate can be inaccurate because the quality of the product under tests is not known.

B. Once the test effort is estimated, resources can be identified and a schedule can be drawn up.

C. Experience based estimation is one of the estimation techniques.

D. Effort estimate depends on the budget of the project.

Correct Answer: D
