QUESTION 1

Which of the following describes when to use the CREATE STREAMING LIVE TABLE (formerly CREATE INCREMENTAL LIVE TABLE) syntax over the CREATE LIVE TABLE syntax when creating Delta Live Tables (DLT) tables using SQL?

A. CREATE STREAMING LIVE TABLE should be used when the subsequent step in the DLT pipeline is static.

B. CREATE STREAMING LIVE TABLE should be used when data needs to be processed incrementally.

C. CREATE STREAMING LIVE TABLE is redundant for DLT and it does not need to be used.

D. CREATE STREAMING LIVE TABLE should be used when data needs to be processed through complicated aggregations.

E. CREATE STREAMING LIVE TABLE should be used when the previous step in the DLT pipeline is static.

Correct Answer: B

QUESTION 2

Which of the following describes a scenario in which a data team will want to utilize cluster pools?

A. An automated report needs to be refreshed as quickly as possible.

B. An automated report needs to be made reproducible.

C. An automated report needs to be tested to identify errors.

D. An automated report needs to be version-controlled across multiple collaborators.

E. An automated report needs to be runnable by all stakeholders.

Correct Answer: E

QUESTION 3

Which of the following describes the relationship between Bronze tables and raw data?

A. Bronze tables contain less data than raw data files.

B. Bronze tables contain more truthful data than raw data.

C. Bronze tables contain aggregates while raw data is unaggregated.

D. Bronze tables contain a less refined view of data than raw data.

E. Bronze tables contain raw data with a schema applied.

Correct Answer: C

QUESTION 4

A data engineer needs to create a table in Databricks using data from their organization\\'s existing SQLite database.
They run the following command:

```
CREATE TABLE jdbc_customer360
USING _____
OPTIONS (
  url "jdbc:sqlite:/customers.db",
  dbtable "customer360"
)
```

Which of the following lines of code fills in the above blank to successfully complete the task?

A. org.apache.spark.sql.jdbc

B. autoloader

C. DELTA

D. sqlite

E. org.apache.spark.sql.sqlite

Correct Answer: E

QUESTION 5

An engineering manager wants to monitor the performance of a recent project using a Databricks SQL query. For the
first week following the project\\'s release, the managerwants the query results to be updated every minute. However,
the manager is concerned that the compute resources used for the query will be left running and cost the organization a
lot of money beyond the first week of the project\\'s release.

Which of the following approaches can the engineering team use to ensure the query does not cost the organization any
money beyond the first week of the project\\'s release?

A. They can set a limit to the number of DBUs that are consumed by the SQL Endpoint.

B. They can set the query\\'s refresh schedule to end after a certain number of refreshes.

C. They cannot ensure the query does not cost the organization money beyond the first week of the project\\'s release.

D. They can set a limit to the number of individuals that are able to manage the query\\'s refresh schedule.

E. They can set the query\\'s refresh schedule to end on a certain date in the query scheduler.

Correct Answer: E
