QUESTION 5

DRAG DROP

Match each key functions of service operation management with its objective.

Select and Place:

<u>Function</u>	<u>Objective</u>
Problem management	Maintain information on components and their relationships that needs to be managed to deliver services
Incident management	Restore cloud services to normal operational state as quickly as possible when unplanned events cause an interruption or downgrade to service quality
Information security management	Prevent incidents that share common symptoms and root causes from reoccurring, and minimize adverse impact of incidents that cannot be prevented
Service asset and configuration management	Prevent occurrence of incidents or activities adversely affecting the confidentiality, integrity, and availability of information in cloud services and service management processes

Correct Answer:

<u>Function</u>	<u>Objective</u>
	Service asset and configuration management
	Incident management
	Problem management
	Information security management
