QUESTION 1

An organization uses Microsoft Active Directory (AD) for service authentication in their private cloud. They want to use the same authentication source for services in the public cloud. External employees access services in both clouds and need to authenticate with AD. The organization wants to minimize and secure network traffic. Which solution will address these requirements?

- A. Connect the two clouds through IPsec VPNPlace AD controllers in the private cloud only
- B. Connect the two clouds through IPsec VPNPlace AD controllers in the private and public clouds
- C. Configure perimeter firewalls to allow AD trafficPlace AD controllers in the private and public clouds
- D. External users connect with IPsec VPNPlace AD controllers in the private cloud only

Correct Answer: B

QUESTION 2

DRAG DROP

You are tasked with designing a new cloud infrastructure. Match each compute related requirement with its proper category.

Select and Place:

REQUIREMENT:	CATEGORY:
Tenant and application separation must be maintained	CAPACITY
Sufficient CPU and memory to run the planned services	AVAILABILITY
Support current and future capacity	SECURITY
Quality of components to deliver operational performance for a specified time	SCALABILITY

Correct Answer:

REQUIREMENT:

CATEGORY:

- Sufficient CPU and memory to run the planned services
- Quality of components to deliver operational performance for a specified time
- Tenant and application separation must be maintained
- Support current and future capacity

QUESTION 3

An organization wants to have showback capability in their private cloud. Which cloud management platform component should be included in the cloud design to support this requirement?

- A. SSO
- B. Service catalog
- C. Metering application
- D. Monitoring application

Correct Answer: C

Note: IT chargeback is an accounting strategy that applies the costs of IT hardware, software, cloud services or shared services to the business unit in which they are used. IT showback is similar to IT chargeback, but the prices are for informational purposes only and no one is billed.

QUESTION 4

Which benefits might be realized by designing a separate infrastructure pool to host network functions?

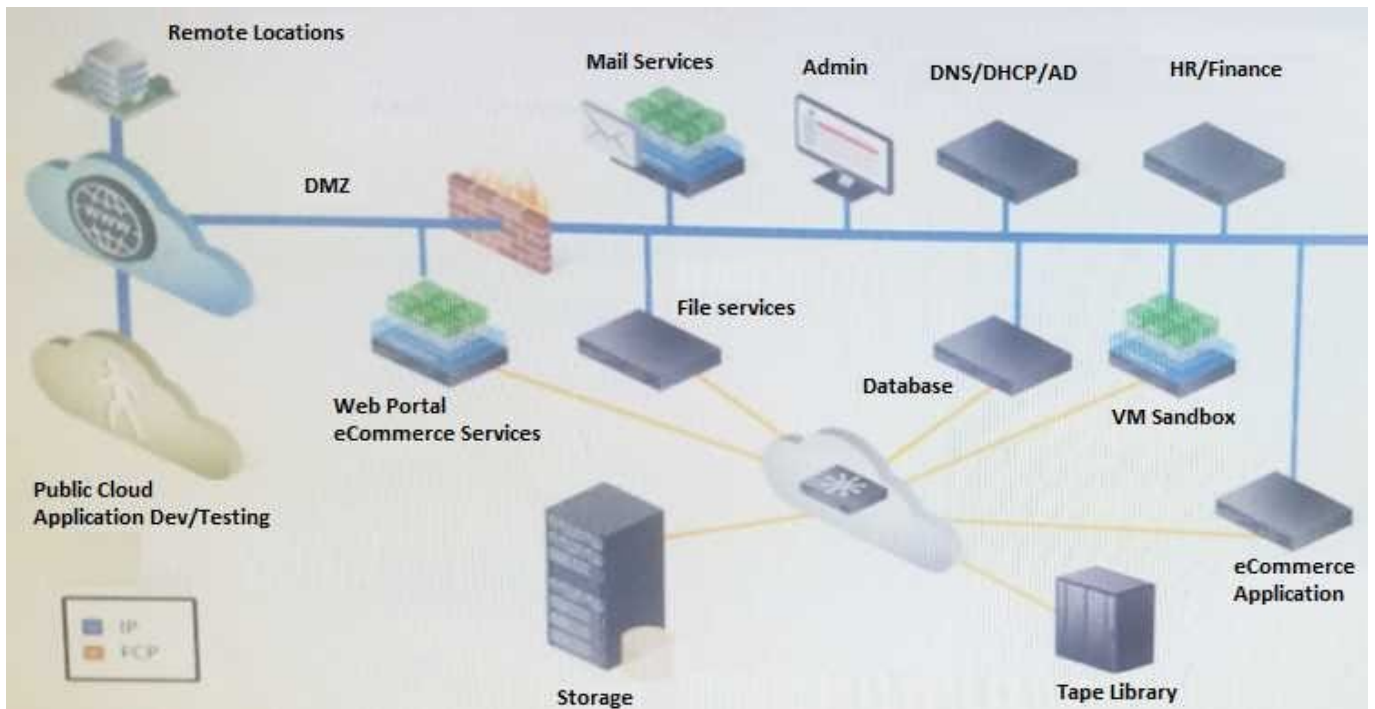

- A. Reduced public IP address consumption, reduced troubleshooting time, and reduced consumer infrastructure load
- B. Reduced troubleshooting time, reduced consumer infrastructure load, and enhanced security
- C. Reduced troubleshooting time, enhanced security, and reduced public IP address consumption
- D. Reduced consumer infrastructure load, enhanced security, and reduced public IP address consumption

Correct Answer: D

QUESTION 5

Case 1

Refer to the exhibit.

Your company recently negotiated several contracts with new customers to use its proprietary eCommerce system. As a result, the customer base has grown rapidly, which has introduced several challenges and requirements.

Business requirements:

Applications need to scale quickly

Metrics and reporting to anticipate business trends and efficient use of resources External customers are looking to license the eCommerce application Other considerations:

Applications need to be recorded for the public cloud

Address security vulnerabilities for customer data in the cloud Refer to Case 1.

You are designing a Do-It-Yourself private cloud solution. What is the recommended way to provide applications the ability to scale quickly?

- A. Increase the overall resource capacity of the system
- B. Restrict the component choices to within a single vendor
- C. Validate new element compatibility against the SSM
- D. Ensure the IT staff understands the configuration options

Correct Answer: A
