QUESTION 1

Why is reducing the fragility of a business system difficult?

A. Because doing so will disrupt the current product and service timelines

B. Because doing so will increase the number of incidents that occur temporarily

C. Because it is difficult to deliberately introduce chaos into the Production environment

D. Because of the high risks of business disruption when integrating large numbers of systems

Correct Answer: D

QUESTION 4

Your team works in three-week iterations and cannot get all the work for a batch done within the iteration. They
frequently encounter bottlenecks.

What is the best reaction of the team after they identify a bottleneck?

A. Discuss with the Product Owner which work can be shifted to another iteration

B. Extend the length of this particular iteration to four weeks to remove the bottleneck

C. Trust that they will solve the bottleneck in the next batch or iteration

Correct Answer: B

QUESTION 5

Commercial off-the-shelf software (COTS) has both advantages and limitations for businesses.

What is true about COTS?

A. COTS supports continuous development with its fast implementation

B. COTS will save the business time and money, by reducing development time

C. Depending on the type of COTS used, the possibility of customization is limited

Correct Answer: B
