### QUESTION 1

An application protected by RecoverPoint has spanned onto a second XtremIO system. How can this application continue to be protected by RecoverPoint?

- A. Create another Consistency Group and define group sets with periodic parallel bookmarks
- B. Reconfigure the existing Consistency Group to be a Distributed Consistency Group
- C. Extend the existing Consistency Group onto the second XtremIO system
- D. Encapsulate the application volumes using VPLEX and use the VPLEX splitter

Correct Answer: D

---

### QUESTION 2

A RecoverPoint administrator needs to add a local copy to three existing Consistency Groups. The RecoverPoint system currently contains 100 Consistency Groups. Each group has one remote copy with 80 replication sets. Each cluster contains eight physical RPAs.

However, the administrator is unable to add all the local copies. What is a cause for this issue?

- A. Consistency Group copy cannot have 1024 volumes within the copy
- B. Cluster has the maximum number of RPAs and cannot be expanded
- C. Addition of the local volumes will exceed the 16K volume limit per cluster
- D. RecoverPoint system needs to be converted to a RP/EX system to support the extra volumes

Correct Answer: A

---

### QUESTION 3

A storage administrator has one production site and one remote site. The administrator configured the RecoverPoint with VNX (SE) cluster at both sites. The current environment has two Consistency Groups configured with two copies each; one production copy and one remote copy. Based on the company's growing business requirements, the administrator has been asked to keep a local copy of the production data.

Which action should occur in order to meet this requirement?

- A. Add a copy into the existing Consistency Group for a local replication
- B. Delete and reconfigure the existing Consistency Group for a local and remote replication
- C. RecoverPoint with VNX (SE) does not support more than two copies in a single Consistency Group
- D. Upgrade the RecoverPoint with VNX (SE) license to RecoverPoint/EX and then reconfigure the Consistency Group

Correct Answer: D

---

**QUESTION 4**

In Unisphere for RecoverPoint, which system analysis tool can verify that Consistency Groups are replicating efficiently or provide recommendations if user action is required?

- A. Detect Bottlenecks
- B. Balance Load
- C. Collect System Information
- D. System Notifications

Correct Answer: A

---

**QUESTION 5**

An administrator wants to integrate Site Recovery Manager (SRM) with RecoverPoint. Where should the RecoverPoint storage replication adapter be installed?

- A. On the same servers running VCenter and the SRM service
- B. On servers running SRM service only
- C. On servers running VCenter only
- D. On a newly installed server

Correct Answer: B
