QUESTION 1

A storage administrator has one production site and one remote site. The administrator configured the RecoverPoint with VNX (SE) cluster at both sites. The current environment has two Consistency Groups configured with two copies each; one production copy and one remote copy. Based on the company's growing business requirements, the administrator has been asked to keep a local copy of the production data.

Which action should occur in order to meet this requirement?

- A. Add a copy into the existing Consistency Group for a local replication
- B. Delete and reconfigure the existing Consistency Group for a local and remote replication
- C. RecoverPoint with VNX (SE) does not support more than two copies in a single Consistency Group
- D. Upgrade the RecoverPoint with VNX (SE) license to RecoverPoint/EX and then reconfigure the Consistency Group

Correct Answer: D

QUESTION 2

A RecoverPoint storage administrator needs to protect a mission critical application. The application is stored on three volumes provisioned from a new VNX. Once the Consistency Group is created for the application, how many replication sets will the group contain?

- A. 1
- B. 2
- C. 3
- D. Determined by the number of copies

Correct Answer: C

QUESTION 3

A physical RecoverPoint cluster is connected to a single VMAX array. When running SAN diagnostics from the boxmgmt menu, what is the minimum number of WWPN can be seen in the storage ports section of the diagnostic test?

- A. 1
- B. 2
- C. 3
- D. 4

Correct Answer: B

QUESTION 4

What is the purpose of the save_settings command?

- A. Create a script file that can later be used to recreate the system configuration
- B. Modify or configure the RecoverPoint configuration backup interval
- C. Preserve the configuration of a RecoverPoint Appliance prior to replacement
- D. Commit cluster configuration changes to the repository volume

Correct Answer: A

QUESTION 5

An administrator wants to integrate Site Recovery Manager (SRM) with RecoverPoint. Where should the RecoverPoint storage replication adapter be installed?

- A. On the same servers running VCenter and the SRM service
- B. On servers running SRM service only
- C. On servers running VCenter only
- D. On a newly installed server

Correct Answer: B
