#### QUESTION 1

The customer has configured a file pool policy on their OneFS 7.0 cluster to place files over 30 days old in the archive tier with a file protection of N+3. The customer attempts to verify the file location and protection setting on a file matching the file pool policy criteria using the `isi get -DD` command. The file is located on the performance tier and has a requested protection setting of N+2:1.

What is the most likely cause of the issue?

- A. The order of the file pool policies
- B. The default policy overrides the file pool policy
- C. The AutoBalance job is paused
- D. The FlexProtect job failed to complete

Correct Answer: A

---

#### QUESTION 2

What is the expected displayed output after running `"isi devices -d 3"`?

- A. Displays the bay, Lnum, da, Serial number, and health status for each drive in node 3.
- B. Displays the individual detailed status information for drive 3 on each node in the cluster
- C. Displays the individual detailed status information for drive 3 on the node you are connected to
- D. Displays the drive controller status and individual drive connectivity status for node 3

Correct Answer: A

---

#### QUESTION 3

You are looking at a cluster event which has an Ancestry of 1.215 and a Instance ID of 1.260. What fact about the event can be derived from this information?

- A. 1.260 is a coalesced event
- B. The event is from the Node Status category
- C. Event 1.215 was quieted, which triggered event 1.260
- D. Event 1.215 has been canceled

Correct Answer: A

---

#### QUESTION 4

How long does the Log Processor retain a backup of log information in the archive directory?

- A. 14 days
- B. 48 hours
- C. 1 week
- D. 1 month

Correct Answer: A

---

#### QUESTION 5

A customer has an Isilon cluster with a substantial video editing workload. They ask you how they can create a custom job to archive older data to NL nodes.

What should be your response?

- A. Custom jobs cannot be created. Implement a SmartPools file policy.
- B. Work with Professional Services to implement a custom job.
- C. The job engine can be custom programmed in python.
- D. Schedule AutoBalance to run more frequently.

Correct Answer: A
