QUESTION 1

Your company is an application service provider that hosts customer applications and data in your data center. The entire infrastructure is client-server based and you have begun to assess the risk of moving your web applications to a cloud-

based infrastructure. During this phase you are required to provide the value of corporate assets involved.

How should you assess these corporate assets?

- A. Use realistic valuations
- B. Create a valuation that is information-asset centric
- C. Use original purchase values
- D. Create values based on accelerated depreciation

Correct Answer: A

QUESTION 2

An appliances manufacturing company that has been in business for many decades is concerned about the slowing growth in their business. They feel that this is mainly due to not being able to retain customers.

Which industry force and related technology need might be impacting this?

- A. Need for social networks to advertise appliances
- B. Need for intelligent machines to produce appliances
- C. Need for mobile applications to buy appliances
- D. Need for big data analytics to detect buying trends

Correct Answer: D

QUESTION 3

An IT department is using a number of tools to automate the expansion and contraction of the cloud resource pools. Which cloud feature are they implementing?

- A. Elasticity
- B. Monitoring
- C. Trust zones
- D. Chargeback

Correct Answer: A

QUESTION 4

In a hypothetical future scenario, a CFO wants the corporation's intelligent lighting system to turn on only when humans are present, as well as change color depending on the time of day and local weather conditions.

What emerging 3rd Platform technologies would enable the desired capabilities?

- A. Big data analytics and augmented humans
- B. Internet of Things and sensor networks
- C. Sensor networks and big data analytics
- D. Augmented humans and Internet of Things

Correct Answer: B

QUESTION 5

An organization wants to use a public cloud provider for IaaS instances. They will develop and deploy their own applications within these instances. The organization must follow health care compliance regulations.

What should the organization ensure before deploying their applications in the public cloud?

- A. Party responsible for encrypting data has been clearly defined.
- B. Cloud provider will provide access to the application logs for auditing
- C. Instances will not be placed in more than one availability zone.
- D. Cloud provider's external auditor has access to the data encryption keys.

Correct Answer: A
