- C. Observation
- D. Document analysis

Correct Answer: D

QUESTION 3

Requirements allocation is an element of which task?

- A. Specify and model requirements
- B. Verify requirements
- C. Define requirements architecture
- D. Define design options

Correct Answer: D

The purpose of Define Design Options is to define the solution approach, identify opportunities to improve the business, allocate requirements across solution components, and represent design options that achieve the desired future state. Requirements allocation is the process of assigning requirements to solution components and releases to best achieve the objectives.
