QUESTION 1

A standard virtual server has been associated with a pool with multiple members. Assuming all other settings are left at their defaults, which statement is always true concerning traffic processed by the virtual server?

- A. The client IP address is unchanged between the client-side connection and the server-side connection.
- B. The server IP address is unchanged between the client-side connection and the server-side connection.
- C. The TCP ports used in the client-side connection are the same as the TCP ports server-side connection.
- D. The IP addresses used in the client-side connection are the same as the IP addresses used in the server-side connection.

Correct Answer: A

QUESTION 2

Assume a virtual server is configured with a ClientSSL profile. What would the result be if the virtual server's destination port were not 443?

- A. SSL termination could not be performed if the virtual server's port was not port 443.
- B. Virtual servers with a ClientSSL profile are always configured with a destination port of 443.
- C. As long as client traffic was directed to the alternate port, the virtual server would work as intended.
- D. Since the virtual server is associated with a ClientSSL profile, it will always process traffic sent to port 443.

Correct Answer: C

QUESTION 3

A site is load balancing to a pool of web servers. Which statement is true concerning BIG-IP's ability to verify whether the web servers are functioning properly or not?

- A. Web server monitors can test the content of any page on the server.
- B. Web server monitors always verify the contents of the index.html page.
- C. Web server monitors can test whether the server's address is reachable, but cannot test a page's content.
- D. Web server monitors can test the content of static web pages, but cannot test pages that would require the web server to dynamically build content.

Correct Answer: A

QUESTION 4

Which statement describes a typical purpose of iRules?

- A. iRules can be used to add individual control characters to an HTTP data stream.
- B. iRules can be used to update the timers on monitors as a server load changes.iRules can be used to update the timers on monitors as a server\'s load changes.
- C. iRules can examine a server response and remove it from a pool if the response is unexpected iRules can examine a server\'s response and remove it from a pool if the response is unexpected.
- D. iRules can be used to look at client requests and server responses to choose a pool member to select for load balancing.

Correct Answer: A

QUESTION 5

Which process or system can be monitored by the BIG-IP system and used as a fail-over trigger in a redundant pair configuration?

- A. bandwidth utilization
- B. duplicate IP address
- C. CPU utilization percentage
- D. VLAN communication ability

Correct Answer: D
