QUESTION 1

Which of the following language categories is MOST commonly used in databases?

- A. Query
- B. Assembly
- C. Markup
- D. Scripting

Correct Answer: A

QUESTION 2

A user received an account compromise notice from an online retailer. Two weeks later, the user received another notice stating the new compromise used the credentials from the first compromise. Which of the following password best practices MOST likely would have prevented the second compromise?

- A. Password age
- B. Password complexity
- C. Password reuse
- D. Password length

Correct Answer: A

QUESTION 3

A systems administrator uses a program that interacts directly with hardware to manage storage, network, and virtual machines. This program is an example of:

- A. a storage area network.
- B. an embedded OS.
- C. network attached storage.
- D. a Type 1 hypervisor.

Correct Answer: D

Unlike Type 2 hypervisors, type 1 hypervisors interact directly with hardware.

QUESTION 4
