

# H12-321<sup>Q&As</sup>

HCIP-WLAN-CEWA V1.0

## Pass Huawei H12-321 Exam with 100% Guarantee

Free Download Real Questions & Answers **PDF** and **VCE** file from:

<https://www.pass2lead.com/h12-321.html>

100% Passing Guarantee  
100% Money Back Assurance

Following Questions and Answers are all new published by Huawei  
Official Exam Center

-  **Instant Download** After Purchase
-  **100% Money Back** Guarantee
-  **365 Days** Free Update
-  **800,000+** Satisfied Customers

**QUESTION 1**

In the 802.11s routing protocol, the following is not a route management frame?

- A. RANN
- B. PREQ
- C. PREP
- D. PS-Poll

Correct Answer: D

---

**QUESTION 2**

Which command can display information about the AP groups in the specified Mesh profile and information about the AP specific profile.

- A. display references mesh-profile
- B. display references ap-system-profile
- C. display references wired-port-profile
- D. display references radio-5g-profile

Correct Answer: A

---

**QUESTION 3**

The Agile Controller has multiple synchronization types, and the most common one is OU-based synchronization. Which of the following information will be synchronized to the Agile Controller from the directory server in OU-based synchronization? (Multiple Choice)

- A. Information of the domain where the OU is located
- B. OU information
- C. User group information
- D. User information

Correct Answer: BD

---

**QUESTION 4**

What is wrong with the following statement about power adjustment?

- A. The transmit power of the AP determines the coverage of its RF signal. The larger the AP power, the larger its coverage.
- B. The global tuning algorithm mainly includes the dynamic channel adjustment algorithm TPC and the transmission power control algorithm DCA.
- C. The traditional RF power control method only statically sets the transmit power to the maximum value, simply pursuing the signal coverage, but excessive power may cause unnecessary interference to other wireless devices.
- D. When dynamically adjusting power, it is necessary to choose an optimal power that balances coverage and signal quality.

Correct Answer: B

---

#### QUESTION 5

Regarding RF tuning, which of the following adjustments are made to ensure that the AP works at its best?

- A. AP channel adjustment
- B. AP signal to noise ratio adjustment
- C. AP power adjustment
- D. Dynamic EDCA parameter adjustment

Correct Answer: AC
