QUESTION 1

In Chinese, the part-of-speech of a word is often not fixed. Generally speaking, words with the same homonym and different shapes have different grammars in different scenes, which brings great difficulties to the part-of-speech tagging.

- A. TRUE
- B. FALSE

Correct Answer: A

QUESTION 2

Convolve a pair of three-channel color images with two 3x3 convolution kernels. How many channels does the resulting feature map have? (Single choice)

- A. 1
- B. 2
- C. 3
- D. 4

Correct Answer: C

QUESTION 3

The image filter operation is also called template operation. Common template operations include template convolution and template row.

- A. TRUE
- B. FALSE

Correct Answer: A

QUESTION 4

The bright part of an image is too bright and the dark part is too dark. Which technique can be used to improve the visual effect of the image? (Single choice)
