QUESTION 1

What is wrong about the AK/SK authentication process among the following options:

A. After single-selecting OceanStor9000 to retrieve SK, use the MD5 algorithm to request the content of Zhang He Encrypt and generate a signature.

B. When the user initiates a data request, the SK and the requested content are encrypted using the IAC algorithm, and a signature is generated name.

C. After OceanStor9000 receives the request and signature, it will check SK according to AK.

D. OceanStor9000 will compare the received signature with the signature calculated by the corresponding system. If yes, the authentication is passed.

Correct Answer: A

QUESTION 2

Huawei\\'s intelligent load balancing technology in distributed storage, its access mode is Active-Active.

A. True

B. Wrong

Correct Answer: A

QUESTION 3

What is wrong about the AK/SK authentication process among the following options:

A. After single-selecting OceanStor9000 to retrieve SK, use the MD5 algorithm to request the content of Zhang He Encrypt and generate a signature.

B. When the user initiates a data request, the SK and the requested content are encrypted using the IAC algorithm, and a signature is generated name.

C. After OceanStor9000 receives the request and signature, it will check SK according to AK.

D. OceanStor9000 will compare the received signature with the signature calculated by the corresponding system. If yes, the authentication is passed. Formula, CPU used, number of node connections

Correct Answer: A

QUESTION 4

Multiple selections The customer value of the InfoEqualizer feature of Huawei Oceanstor 9000 (C30) is reflected in: (multiple selections)

A. Oceanstor 9000 can distribute requests to relatively idle nodes according to the current business load smart address of each node, thereby improving Improved client access performance

B. Oceanstor 9000 grams automatically senses failures and adjusts services to other normal nodes, thereby improving the reliability of client service access

C. This feature is a basic feature, no need to buy a license, saving cost

D. Allow the client to use the domain name to access Oceanstor 9000, and the client operator does not need to know the specific IP address of each visit. Simplified Management operations, thereby reducing management costs

Correct Answer: ABD

QUESTION 5

On the basis of inheriting the high reliability design of OceanStor storage system, HyperMetro has newly designed some solutions Case-level high-reliability technology maximizes the reliability of the storage active-active solution. HyperMetro\\'s high-reliability technology is mainly reflected in.

Which of the following? (multiple choice)

A. Cross-site cluster

B. Cross-site data real-time mirroring

C. Arbitration to prevent split brain

D. Cross-site bad block repair

Correct Answer: ABCD
