QUESTION 1

A Hitachi NAS Platform 4000 customer is enquiring about the Server Farm Migration feature. Which three statements are correct? (Choose three)

A. If the source server is offline, the migration can be performed.

B. Assignment of tape drives will be done automatically after the EVS migration.

C. During the EVS migration the source server settings will not be cloned to the destination server

D. The source and destination servers must be running the same major firmware level.

E. The source and destination servers can be running different major firmware levels.

Correct Answer: ACD

QUESTION 2

Which two statements are correct about Tiered File Systems (TFS)? (Choose two.)

A. Snapshot data is preserved in both tiers 0 and 1.

B. Only SSD and SAS storage can be used for tier 0.

C. TFS should only be used with WFS-2.

D. A maximum of three tiers are supported using WFS-2

Correct Answer: AC

QUESTION 3

You are designing a replication solution for a production Hitachi NAS Platform. The solution requires file level replication to another Hitachi NAS Platform. However, there is a concern that the time to detect incremental changes will exceed the RPO. What should be done to reduce the replication time?

A. Use Transfer Primary Access.

B. Use the changed directory list option.

C. Migrate the admin EVS to the node replicating the data.

D. Create an additional IP address on the source EVS.

Correct Answer: B

QUESTION 4

You are planning a data migration from a distributed Windows file server environment to a Hitachi NAS

Platform 4000. You have discovered that some of the applications use hard-coded IP addresses. You

have also identified that login scripts are used to map network drives for the end users.

Which two methods should you use to minimize impact to users? (Choose two.)

A. Modify the login scripts to point to the new location.

B. Use CNAME records to preserve the IP addresses for hard-coded applications.

C. Use the same IP addresses on the EVS as the original server for applications.

D. Use CHS to present a unified namespace and transparently migrate the applications.

Correct Answer: AC

QUESTION 5

The administrator of a Hitachi NAS Platform 4000 has to integrate their NAS into their backup system

using NDMP.

What must be done on the Hitachi NAS Platform?

A. Set NDMP version to 5.

B. Define the file systems to be backed-up.

C. Set the NDMP username and password,

D. Run the ndmp-enhanced-stats CLI command.

Correct Answer: C
