QUESTION 1

You are managing a HCP solution in a Windows Active Directory environment. You are trying to add and configure a HCP user account but your access rights do not allow you to perform this function. What should your login account have to solve this problem?

- A. the service role
- B. the administrator role
- C. the security role
- D. the Active Directory administrator role

Correct Answer: C

QUESTION 2

When referring to replication topologies, how many outbound links can a HCP system have?

- A. 1 outbound link
- B. 2 outbound links
- C. 4 outbound links
- D. 5 outbound links

Correct Answer: A

QUESTION 3

During installation, you configured the NTP option as internal. Post installation, the customer instructs you to configure the NTP option with external servers. The HCP internal clock is currently more than 20 minutes out of sync with the current time. What will happen when you configure NTP with external servers?

- A. The next time the HCP is restarted, the current time will be changed.
- B. The current time will be set then HCP will restart.
- C. The current time will be set and HCP will not restart.
- D. Any search nodes in the HCP will re-index all their data;

Correct Answer: B

QUESTION 4

In the event of a replication link failure, what is the default timeout (in minutes) before HCP issues an SNMP broken-link

report?

- A. 15
- B. 30
- C. 60
- D. 120

Correct Answer: C

QUESTION 5

A customer has ordered a 20-node HCP system. You have a limited amount of time to perform the installation. Which action should you take to save time?

- A. Create a core software CD for each node.
- B. Create an appliance OS CD for each node.
- C. Assign all nodes the same IP back-end addresses.
- D. Assign all nodes the same IP front-end addresses.

Correct Answer: B
