QUESTION 1

You are setting up an Hitachi Storage Cluster (HSC) for Microsoft Environments for a customer who wishes to have a fileshare resource called engDep highly available. This fileshare will be configured on a Physical Disk called diskE . The Generic Script resource is called SCScript. What is the correct dependency order for setting up these resources?

- A. EngDep is dependent on diskE and diskE is dependent on SCScript
- B. EngDep is dependent on diskE and engDep is dependent on SCScript
- C. DiskE is dependent on engDep and diskE is dependent on SCScript
- D. EngDep is dependent on SCScript and diskE is dependent on SCScript

Correct Answer: A

QUESTION 2

The write I/O workload imposed by the host to the primary Universal Storage Platform of a Three Data Center (3DC) configuration is 150 MB/sec, with the maximum size of Journal Groups being 700GB. Which two configurations meet the requirements? (Choose two.)

- A. Journal Groups made with one 7+1 (146GB) array groups. Primary to secondary Universal Replicator paths made with 2 GB/s Fibre Channel links.
- B. Journal Groups made with eight Journal Volumes on four 7+1 (72GB 15Krpm) array groups. Primary to secondary Universal Replicator paths made with 2 GB/s Fibre Channel links.
- C. Journal Groups made with twelve Journal Volumes on four 7+1 (72GB 15Krpm) array groups. Primary to secondary Universal Replicator paths made with 1GB/s FCIP compressed links.
- D. Journal Groups made with sixteen Journal Volumes on two 7+1 (146GB) array groups. Primary to secondary Universal Replicator paths made with 1GB/s Fibre Channel links.

Correct Answer: BC

QUESTION 3

A customer has twenty LUNs to manage in a TrueCopy Extended Distance configuration. Which product would be used to manage the pool?

- A. Storage Navigator
- B. Storage Navigator Modular
- C. Command Control Interface (CCI)
- D. Disk Array Management Program (DAMP)

Correct Answer: B

QUESTION 4

While testing a TrueCopy Asynchronous implementation, the pairs in a Copy Group suspend unexpectedly. It is determined that the suspend is due to a sidefile puncture. Which three criteria must be considered when determining the cause of the sidefile puncture? (Choose three.)

- A. insufficient journal space
- B. insufficient cache memory
- C. remote link distance too long
- D. insufficient remote link bandwidth
- E. excessive contention on secondary Array Groups

Correct Answer: BDE

QUESTION 5

A customer has an application that must have a second complete (zero RPO) copy of the data, The second site is 70km away. It is a multi-task application and has strong SLAs. Which two solutions should the customer consider to ensure that overheads are kept to a minimum? (Choose two.)

- A. 2 x USP running TrueCopy Asynchronous linked by DWDM
- B. 2 x USP running TrueCopy Synchronous linked by 2 x OC-3
- C. 2 x AMS1000 running TrueCopy Synchronous linked by DWDM
- D. 2 x USP running Hitachi Universal Replicator linked by 2 x OC-3

Correct Answer: BC
