### QUESTION 1

In which two ways can an administrator ensure that Patient Risk scores are recalculated periodically? (Choose Two.)

- A. Setup a scheduled Apex batch job.
- B. Use the CMS recalculation API
- C. Use a third party API to recalculate CMS risk score
- D. Setup a Apex batch job and run the job manually
- E. Create a Healthcare Provider enrollment flow.

Correct Answer: AD

Reference and details below.

## Calculate Referral Scores

Calculate referral scores with a batch Apex job.

Referral scores are based on the Total Referrals and Converted Referrals fields on the referring practitioner's contact record. The calculated score appears in the Referrer Score field.

Use the scheduled job class name: `HcReferrerScoreScheduledJob`. To invoke Apex classes to run at specific times, first implement the `Schedulable` interface for the class. Then, schedule an instance of the class to run at a specific time using the `System.schedule` method.

 **Example:** To run the `HcCMSRiskScoringScheduledJob` class once, select **Debug | Open Execute Anonymous Window**. Enter the following text in the Enter Apex Code window in Developer Console.

```
// scheduled job sample
int batchSize = 200;
SchedulableContext sc = null;
HcReferrerScoreScheduledJob scheduledJob = new HcReferrerScoreScheduledJob(batchSize);
scheduledJob.execute(sc);
```

### QUESTION 2

Which three of the following statements are true about Care Plan Templates? (Choose Three.)

- A. When creating a care plan with a template you can unselect tasks so they will not be included.
- B. The sort order of the Task group by Fields can be changed under custom setting task group.
- C. Care plan templates must include at least 1 problem, 1 goal and 1 task.
- D. When creating a care plan with a template you can change the offsets of the tasks.
- E. Care plan templates can only be used when creating a new care plan.

Correct Answer: ACE

---

**QUESTION 3**
