### QUESTION 1

An administrator wants to add additional fields to their Provider Search capabilities. Which two objects can they map fields from? (Choose Two.)

- A. Healthcare Practitioner Facility
- B. Care Provider Searchable Field
- C. Person Account
- D. Account
- E. Healthcare Provider

Correct Answer: AE

Reference and details below.

## Use Custom Fields to Run Provider Searches

In addition to the many standard fields in the Provider data model, you can also run searches for providers using custom fields based on your business needs. To use your custom fields with Provider Search, you can map them to custom fields in the Care Provider Searchable Field object.

- The custom fields must be in either the `HealthcareProvider` or `HealthcarePractitionerFacility` objects.
  - The custom fields must be of the type text, single-select picklist, or multi-select picklist.
1. From Object Manager, use Quick Find to find **Care Provider Searchable Field**.
  2. Create a text field to map to the custom field that you want to use in your searches.  
Make a note of the API name you set for this new field.
  3. In Setup, use the Quick Find box to find **Care Provider Search Config**.
  4. Click **New Care Provider Search Config**.
- 

### QUESTION 2

Which is true about choosing a care request type when setting up a new care request record?

- A. Any case record type can be chosen when creating care request.
- B. A care request type cannot be chosen when creating a new care request.
- C. A case record type can be chosen to identify a single care request type for each care request.
- D. Multiple care request types can be chosen for a single care request.

Correct Answer: B

---
