QUESTION 1

A customer has an HPE MSA 2052 with SAS drives. Due to performance issues, you plan to add an SSD tier to the solution.

What needs to be configured for hot data being moved to the SSD tier?

- A. Modify common provisioning group for SSD as tier 0.
- B. Schedule tiering task to monitor volume utilization and choose SSD drives for tier 0 usage.
- C. Set owning controller for SSD to a disk group other than spinning disks for more performance.
- D. Enable virtual volume Preference as Performance.

Correct Answer: B

QUESTION 2

A customer is moving their storage from HPE ProLiant Servers with direct attached HPE D3700 storage shelves, to HPE StoreVirtual VSA. The customer is concerned about management capabilities.

Which tool should you demonstrate to the customer?

- A. Storage Management Utility
- B. Centralized Management Console
- C. InfoSight
- D. StoreServ Management Console

Correct Answer: B

QUESTION 3

DRAG DROP

Match the tools and resources with the features they provide.

Select and Place:

Tool or Resource	Features
HPE Spock	enables you to work with your customers to design a storage infrastructure to meet their needs
HPE Storage Sizing Tool	provides graphics that you can use to create diagrams, storage network cable management, and schematics for your proposed solutions
VisioCafe	provides a mix of validated storage configurations, guidelines, and suggestions on a variety of HPE storage solutions

Correct Answer:

Tool or Resource	Features
	HPE Storage Sizing Tool enables you to work with your customers to design a storage infrastructure to meet their needs
	VisioCafe provides graphics that you can use to create diagrams, storage network cable management, and schematics for your proposed solutions
	HPE Spock provides a mix of validated storage configurations, guidelines, and suggestions on a variety of HPE storage solutions

QUESTION 4

What is used to create connections between Fibre Channel SAN Switches?

- A. ISL
- B. NPIV
- C. FCIP
- D. FCoE

Correct Answer: A

QUESTION 5

What is an advantage of having hardware-assisted RAID parity generation versus a software-only implementation?

- A. Parity generation does not add overhead to normal system operation
- B. More than one RAID level can be run currently and independently of each other
- C. Less parity needs to be generated when changes to existing data are made
- D. Available RAID levels are greatly increased

Correct Answer: A
