QUESTION 1

An architect needs to scope the number of required m710p cartridges for video transcoding. The architect plans to aim for an additional 20 to 25 percent growth capacity.

In addition to this growth capacity, which factors will determine the number of required cartridges? (Choose two.)

A. the amount of memory required

B. the number of video streams required

C. the number of formats to which to convert

D. the number and type of processors

E. the amount of storage capacity required

Correct Answer: BE

QUESTION 2

An architect is planning an HPE Integrity Superdome X solution. One nPartition will include two HPE BL920s Gen9 blades. After discussions and testing, the architect determines that the nPartition requires more memory than initially planned. Which approach should the architect recommend to the customer to ensure optimum performance?

A. Provision each blade in the nPartition with the same amount of memory

B. Add DIMMs in multiples of 12 even if this means adding more capacity than necessary

C. Favor using lower capacity DIMMs to fill more memory slots on each channel

D. Avoid using all memory channels on a processor

Correct Answer: A

QUESTION 3

An architect proposes an HPE Apollo solution for a customer\\'s environment. The customer needs the ability to have each of the network adapters in the HPE Apollo server connect to separate switches while also allowing them to be bonded for load-balancing.

Which networking feature on the switches will meet the customer\\'s need?

A. Virtual Extensible LAN (VXLAN)

B. Intelligent Resilient Framework (IRF)

C. Network Virtualization using Generic Routing Encapsulation (NVGRE)

D. Transparent Interconnection of Lots of Links (TRILL)

Correct Answer: B

3 / 3

QUESTION 4

A customer has 1,000 virtual machines that run on VMware ESXI servers. The customer is concerned that some of the virtual machines may be oversized, which could affect the other virtual machines. Which HPE product should the architect recommend to help the customer with infrastructure sizing, to improve efficiency, and to reduce cost?

A. HPE Operations Analytics for HPE OneView

B. HPE Insight Control

C. HPE Helion CloudSystem 9

D. HPE Cloud Optimizer for HPE OneView

Correct Answer: D

QUESTION 5

An architect is determining the amount of memory to propose for an HPE XL230a compute tray.

The customer specifies several requirements, properties, and parameter of the application.

Which factor will critically affect the memory amount requirement to prevent a potential memory bottleneck?

A. The application stores data on local drives.

B. The application requires CPUs with multiple cores to support multiple HPC jobs.

C. The application is single-threaded high performance computing (HPC).

D. Secure Encryption of locally stored data is required.

Correct Answer: B
