QUESTION 1

HOTSPOT

An integrator is creating a server profile template for a VMware Cluster in a Synergy environment. The network administrator has given the server team two 40Gb uplinks with all 200 VLANs presented.

Click the appropriate network type that the integrator should select.

Hot Area:

Create Uplink Set?

General

Name	<input type="text"/>						
Type	<table border="1" style="width: 100%;"><tr><td>Select type</td></tr><tr><td>Ethernet</td></tr><tr><td>Fibre Channel</td></tr><tr><td>Tunnel</td></tr><tr><td>Untagged</td></tr><tr><td>Image Streamer</td></tr></table>	Select type	Ethernet	Fibre Channel	Tunnel	Untagged	Image Streamer
Select type							
Ethernet							
Fibre Channel							
Tunnel							
Untagged							
Image Streamer							

Create Create + Cancel

Correct Answer:

Create Uplink Set ?

General

Name

Type

Select type
Ethernet
Fibre Channel
Tunnel
Untagged
Image Streamer

QUESTION 3

An integrator is installing three Synergy frames in different locations for a customer. As part of the installation, the customer requests a single monitoring dashboard that shows the current hardware status, warranty status, and open support cases of all three frames.

Which configuration steps must the integrator perform to provide the customer with this functionality?

- A. Enable Remote Support and Insight Online Integration in the Composer UI
- B. Install Insight Remote Support Advanced, and integrate it with HPE Global Dashboard

- C. Configure OneView with iLO Amplifier pack
- D. Activate iLO Federation on all installed compute nodes

Correct Answer: C

QUESTION 4

How can an integrator increase the efficiency with which a Synergy solution can be provisioned? (Choose two.)

- A. Use a Multimodule Link Aggregation Group (MLAG) to automate link failover
- B. Use Composer as a PXE server to automate OS deployments
- C. Enable all the compute nodes to boot from SD card in a server profile
- D. Implement Image Streamer to provide a stateless OS environment
- E. Use Powershell to automate configuration and application of server profiles

Correct Answer: DE

QUESTION 5

A customer needs to expand a single-frame Synergy solution to two frames.

What should the integrator do to establish a proper management network for the two frames?

- A. Connect the RJ-45 management ports of the Virtual Connect modules together with redundant CAT6A cables.
- B. Disconnect the existing management ring, and cable the Frame Link Modules in the first frame to the Frame Link Modules in the added frame.
- C. Connect the RJ-45 front panel connectors on the two frames together with a single CAT6A cable.
- D. In the Synergy console, select the Frame Link Modules in the new frame and define the connection between them.

Correct Answer: D
