**QUESTION 1**

What is required to add remote frame link topology to HPE OneView?

- A. The IP address assigned to HPE Composer installed in a remote site must be registered in a primary site
- B. Multi-site licenses must be added to HPE OneView and activate for all available HPE Synergy frames
- C. The HPE OneView certificate from the primary site must be added to HPE OneView in the remote site
- D. Management ports of the remote frame link topology must be connected to the management LAN

Correct Answer: D

---

**QUESTION 2**

Your customer wants to manage their HPE Superdome Flex using HPE OneView. Which component must be added to HPE OneView to accomplish this task?

- A. Baseboard Management Controller (BMC)
- B. Rack Management Controller (RMC)
- C. all nPARs created within the complex
- D. only the base chassis from the complex

Correct Answer: A

---

**QUESTION 3**

Refer to the exhibit.

**Create Logical Interconnect Group** General ?

**General**

Name: LIG-Ethernet

**Logical Interconnect Group**

Using the selectors below, describe the logical interconnect group to be created and then click "Select interconnects" to see the bay and interconnect choices.

Interconnect type: Virtual Connect SE 100Gb F32 Module for Synergy

Enclosure count: 1

**Logical Interconnect Group**

Using the selectors below, describe the logical interconnect group to be created and then click "Select interconnects" to see the bay and interconnect choices.

Interconnect type: Virtual Connect SE 100Gb F32 Module for Synergy

Enclosure count: 1

Interconnect bay set: 3

Redundancy: **Redundant** (highlighted), Non-redundant (A-side only), Non-redundant (B-side only)

Downlink speed: (empty)

**Select interconnects**

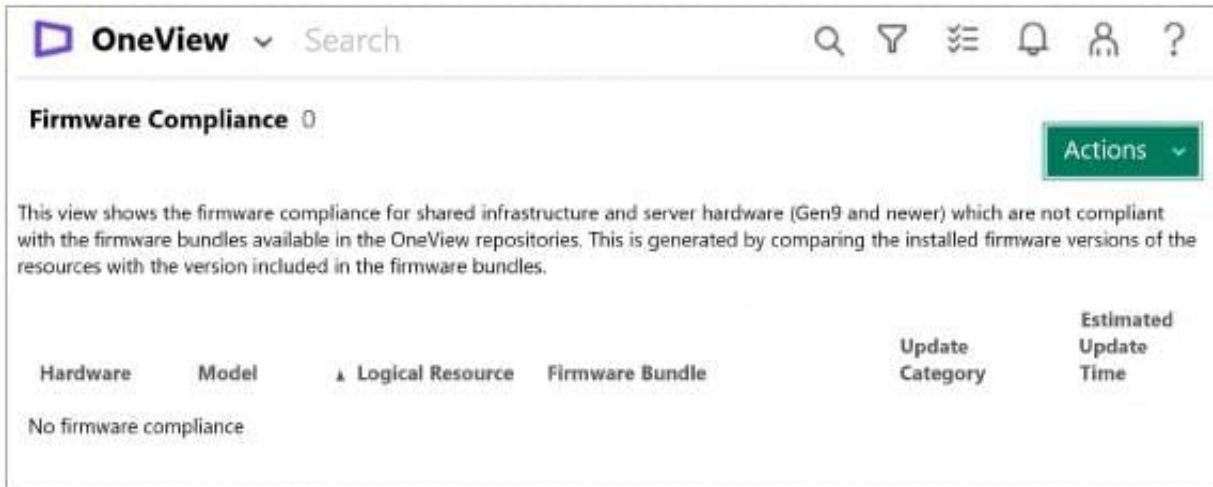

Your customer wants to define a Logical Interconnect Group (UG) and set the redundancy of the master modules to highly available, but this option is not available. What is a possible reason?

- A. There are not sufficient frames for highly available setup.
- B. Some master modules only support a redundant setup.
- C. Firmware on the master modules is too low to support highly available setup.
- D. A dedicated license must be added to HPE OneView to enable this feature.

Correct Answer: B

**QUESTION 4**

Refer to the exhibit:

A customer complains that firmware compliance is empty. The customer confirmed that Synergy Service Pack is uploaded to the HPE OneView repository. How should you respond?

- A. The firmware repository is not defined within firmware compliance report
- B. The firmware repository service must be restarted using maintenance connection
- C. The refresh procedure must be performed on each logical enclosure to refresh firmware
- D. All of the components are up to date and compliant with firmware baseline

Correct Answer: B

**QUESTION 5**

Which statement about logical JBODs configured using KPE OneView and D3940 Storage Modules is true?

- A. A logical JBOD lifecycle can be associated with a server profile lifecycle and drives can be securely erased
- B. A logical JBOD cannot be created during server profile creation and must be prepared in advance
- C. Different types of the drives can be used within a logical JBOD as long as they have the same capacity
- D. Logical JBOD functionality must be enabled on the Enclosure Group level by a storage administrator

Correct Answer: B
