**QUESTION 1**

Physical labels and \_\_\_\_\_ are two common forms of labeling which are mentioned in ISO 27002.

- A. metadata
- B. teradata
- C. bridge

Correct Answer: A

---

**QUESTION 2**

What sort of security does a Public Key Infrastructure (PKI) offer?

- A. It provides digital certificates that can be used to digitally sign documents. Such signatures irrefutably determine from whom a document was sent.
- B. Having a PKI shows customers that a web-based business is secure.
- C. By providing agreements, procedures and an organization structure, a PKI defines which person or which system belongs to which specific public key.
- D. A PKI ensures that backups of company data are made on a regular basis.

Correct Answer: D

---

**QUESTION 3**

Peter works at the company Midwest Insurance. His manager, Linda, asks him to send the terms and conditions for a life insurance policy to Rachel, a client. Who determines the value of the information in the insurance terms and conditions document?

- A. The recipient, Rachel
- B. The person who drafted the insurance terms and conditions
- C. The manager, Linda
- D. The sender, Peter

Correct Answer: A

---

**QUESTION 4**

Logging in to a computer system is an access-granting process consisting of three steps: identification, authentication and authorization.

What occurs during the first step of this process: identification?

- A. The first step consists of checking if the user is using the correct certificate.
- B. The first step consists of checking if the user appears on the list of authorized users.
- C. The first step consists of comparing the password with the registered password.
- D. The first step consists of granting access to the information to which the user is authorized.

Correct Answer: B

---

#### QUESTION 5

Why is compliance important for the reliability of the information?

- A. Compliance is another word for reliability. So, if a company indicates that it is compliant, it means that the information is managed properly.
- B. By meeting the legislative requirements and the regulations of both the government and internal management, an organization shows that it manages its information in a sound manner.
- C. When an organization employs a standard such as the ISO/IEC 27002 and uses it everywhere, it is compliant and therefore it guarantees the reliability of its information.
- D. When an organization is compliant, it meets the requirements of privacy legislation and, in doing so, protects the reliability of its information.

Correct Answer: B
