**QUESTION 1**

In discussions with your customer about their requirements for storage in an existing server installation, you are asked what is the maximum number of drives that may be controlled by the Intel Raid Module RMS3CC080? Please choose your answer from the list below.

- A. 8 Drives
- B. 32 Drives
- C. 80 Drives
- D. 128 Drives
- E. 256 Drives

Correct Answer: D

---

**QUESTION 2**

You have been asked to explain to your customer the RAS features of the server that you are suggesting they purchase. In particular they have requested more information on two elements in the DRAM within the server. They would like to know what "ECC" means and what "Scrubbing" means. (Select ALL that apply).

- A. ECC means Error Collection and Cleaning
- B. Error Collection and Cleaning are part of what Scrubbing does but they are not synonymous.
- C. Scrubbing includes reading all memory locations and then resetting the parity bit to 0.
- D. ECC means Error Correcting Code.
- E. Scrubbing involves reading from each memory location, correcting bit errors if any and writing the corrected data back to the same location.
- F. ECC and scrubbing are synonymous.

Correct Answer: DE

---

**QUESTION 3**

Which of the following RAID levels requires at least four hard disks?

- A. RAID 0
- B. RAID 1
- C. RAID 5
- D. RAID 10

Correct Answer: D

---

**QUESTION 4**
