QUESTION 1

Which of the following applies to the term Unified Data Centre Fabric? (Select ALL that apply).

A. A convergence of different network protocols, such as iSCSI and FCoE to integrate seamlessly into an existing infrastructure.

B. SAN connectivity to all servers using FCoE without the need to invest in dedicated fibre channel HBAs or a secondary infrastructure.

C. iSCSI storage dedicated to each server in the fabric.

D. Data Centre Bridging does not allow lossless traffic via Ethernet making it suitable for SAN traffic.

E. NAS connectivity for each of the connected servers in the fabric.

Correct Answer: AB

QUESTION 2

Your customer is looking for new servers. Space is very limited; they have room for one new rack and want to add at least 30 servers. The servers need to be able to support E5-2600 v3 14 core processors, 768GB memory and 8 HDDs. Which of the following configurations would you recommend?

A. HNS2600TP and H2216XXKR2.

B. R2208WT2YS.

C. R1208WTXXX.

D. R1304WTXXX.

Correct Answer: C

QUESTION 3

Your customer calls with an error message they noticed while making some changes in the BIOS setup screen; stating that the "SEL is full." What does this mean and how would you advise your customer to correct this error from the list below?

A. They should enable the option "Clear the SPI flash memory."

B. They should clear the SEL using SELViewer

C. They should clear the SEL using SELclear utility

D. They should enable the option "Clear SEL" in BIOS

E. They should install an additional flash drive for the SEL

Correct Answer: B

QUESTION 4

Your customer has enabled BMC management and remote access in the event that they need you the Intel Server Specialist to perform remote reporting or diagnostics. They want to know if chassis status lights and buttons are available via the Embedded Web Server, and if so which ones. (Select ALL that apply).

A. Only power and reset buttons are available

B. Only the power and status LEDs are visible via the EWS

C. Only the power LED is visible through the EWS

D. The power, chassis id and status LEDs are available

E. Power, reset and chassis id buttons are available

F. Only the chassis id is available through the EWS

Correct Answer: DE

QUESTION 5

You are giving your customer a brief overview of some of the Intel technologies that are enabling intelligent and secure cloud deployments. Which of the following combinations relate specifically to providing secure cloud implementations? (Select ALL that apply).

A. Intel® QuickAssist Technology and offloading cryptography and data compression to hardware accelerators

B. Intel® Xeon® Phi™coprocessors and massively parallel technical computing

C. Intel® AES-NI and high speed encryption/decryption

D. Intel® AVX and Intel AVX 2.0 and high speed encryption/decryption

E. Intel® Xeon® Phi™coprocessors and offloading cryptography and data compression to hardware accelerators

F. Intel® QuickAssist Technology and massively parallel technical computing

Correct Answer: AC
