### QUESTION 1

You are concerned about users downloading malicious attachments at work while using encrypted Web mail. You want to block these malicious files using your SRX Series device.

In this scenario, which two features should you use? (Choose two.)

- A. SSL reverse proxy
- B. SSL forward proxy
- C. Sky ATP SMTP scanning
- D. Sky ATP HTTP scanning

Correct Answer: BC

---

### QUESTION 2

You are creating a security design proposal for an enterprise customer. As part of the design, you are implementing 802.1x authentication on your EX Series devices.

In this scenario, which two statements are correct? (Choose two.)

- A. The supplicant is the device that prevents the authenticator's access until it is authenticated
- B. The supplicant is the device that is being authenticated
- C. The authenticator is the device that is being authenticated
- D. The authenticator is the device that prevents the supplicant's access until it is authenticated

Correct Answer: BD

---

#### QUESTION 4

Which statement is correct about service chaining?

- A. Service chaining uses IPsec to connect together two or more VMs
- B. Service chaining evaluates traffic by using multiple security features on the same instance
- C. Service chaining redirects traffic back through the same device for additional processing
- D. Service chaining combines multiple VNF instances together in the data flow

Correct Answer: D

---

#### QUESTION 5

What are two benefits of the vSRX in a virtualized private or public cloud multitenant environment? (Choose two.)

- A. full logical systems capabilities
- B. stateful firewall protection at the tenant edge
- C. 100GbE interface support
- D. OSPFv3 capabilities

Correct Answer: AB
