QUESTION 1

You are asked to prepare a design proposal for a new enterprise customer. You must ensure that all traffic is routed through and inspected by an SRX Series device located at the corporate headquarters. In this scenario which solution should be used?

- A. Use a full mesh SD-WAN solution
- B. Use a full mesh Layer 3 VPN solution
- C. Use a Junos Fusion Enterprise solution
- D. Use a hub-and-spoke Layer 3 VPN solution

Correct Answer: D

QUESTION 2

You have a customer that operates multiple branch offices and they want a low cost access solution. The WAN must be secure What would satisfy their requirement?

- A. an encrypted MPLS service
- B. an IPsec VPN using broadband connections
- C. a private WAN
- D. a managed MPLS service

Correct Answer: B

QUESTION 3

Your customer is paying for traffic prioritization and you must ensure that all traffic from their 172.27.

10.0/24 network receives top priority through your network.

Which action will satisfy this requirement?

- A. Apply a behavior aggregate classifier to the egress interface.
- B. Apply a custom rewrite rule to the ingress interface.
- C. Apply a multifield classifier to the ingress interfaces.
- D. Apply a custom scheduler map to the ingress interface.

Correct Answer: C

We would need MF to match the address and set the forwarding class.

QUESTION 4

Your company is designing a new data center in a remote location that must be connected to your local data center. You have a service provider connection between the CE devices at each site. You want to implement EVPN with VXLAN services between sites, but the service provider does not offer EVPN services. Which two statements are true in this scenario? (Choose two)

- A. The provider's edge devices must map your VXLAN VNIs to MPLS LSPs within the provider network at each site
- B. The customer's edge devices within your data center can act as VXLAN Layer 2 gateways
- C. You can still implement EVPN service across the service provider as long as there is IP reachability between the sites.
- D. The service provider must provide an MPLS-based VPN connection between sites

Correct Answer: BC

QUESTION 5

Your customer's WAN edge connects to two service providers SP-A and SP-B. The customer is advertising a single /22 subnet to both service providers through EBGP peering sessions. The customer wants to influence inbound traffic to the advertised /22 destination prefix so that it passes through SP-A when both paths are operational. Which action meets the customer's requirement?

- A. Advertise the prefix to SP-A with a lower MED value than that sent to SP-B.
- B. Advertise the prefix to SP-B with an origin of unknown.
- C. Advertise the prefix to SP-B with a lower MED value than that sent to SP-A.
- D. Advertise the prefix to SP-A with an origin of unknown.

Correct Answer: A
