QUESTION 1

Which security feature is applied to traffic on an SRX Series device when the device is running in packet mode?

- A. Sky ATP
- B. ALGs
- C. Firewall filters
- D. Unified policies

Correct Answer: C

QUESTION 2

Which statements are correct about SKY ATP?

- A. Sky ATP is an open-source security solution.
- B. Sky ATP is used to automatically push out changes to the AppSecure suite.
- C. Sky ATP only supports sending threat feeds to vSRX Series devices.
- D. Sky ATP is a cloud-based security threat analyzer that performs multiple tasks.

Correct Answer: D

QUESTION 3

Which two statements are correct about using global-based policies over zone-based policies? (Choose two.)

- A. With global-based policies, you do not need to specify a destination zone in the match criteria.
- B. With global-based policies, you do not need to specify a source zone in the match criteria.
- C. With global-based policies, you do not need to specify a destination address in the match criteria.
- D. With global-based policies, you do not need to specify a source address in the match criteria.

Correct Answer: AB

QUESTION 4

You are concerned that unauthorized traffic is using non-standardized ports on your network. In this scenario, which type of security feature should you implement?

- A. Application firewall

- B. Sky ATP
- C. Firewall filters
- D. Zone-based policies

Correct Answer: A

QUESTION 5

Which Statement is correct about Sky ATP?

- A. The local Sky ATP platform downloads the latest threat from managed site
- B. Sky ATP can provide live threat feeds to SRX series devices
- C. Sky ATP is a local hardware-based security threat analyzer that performs multiple tasks.
- D. Sky ATP relies on the SRX series device to open and analyze suspect file attachments

Correct Answer: B
