QUESTION 1

You are trying to remove an address book entry by going to the Address Book->List display of the Web UI, but you cannot find the remove option. What would cause this problem?

- A. An address book entry can only be deleted from the command line interface. You will need to use the CLI to delete it.
- B. The address book entry is misconfigured. You need to correct the address book entry before it will allow you to delete it.
- C. You cannot remove an address book entry from this screen. You need to use the delete option found under the management options screen
- D. The address book entry is being used by a policy. You must delete the policy or remove the address book entry from the policy before it can be deleted.

Correct Answer: D

QUESTION 2

Which statement accurately describes the exec config rollback feature?

- A. It allows the administrator to re-apply a previously saved configuration file from a list of LKG files in flash.
- B. Once the LKG file is created, it allows the administrator to re-apply a previously saved configuration file from flash without rebooting.
- C. Once the LKG file is created, it allows the administrator to re-apply a locked configuration file from a separate area in flash.
- D. Once the LKG file is created, it allows the administrator to revert to the prior ScreenOS image or configuration file in the event an upgrade operation aborts.

Correct Answer: C

QUESTION 3

By default, from which hardware component is the startup copy of the ScreenOS loaded?

- A. NVRAM
- B. TFTP server
- C. internal flash
- D. PCMCIA card

Correct Answer: C
