QUESTION 1

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while

others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You are configuring a Dynamics 365 for Finance and Operations environment.

You must set up Microsoft Excel data exports.

You need to verify that the solution will result in a successful export of data to Excel.

Solution: Use Open in Excel to open an entity form that does not share the same root data source by implementing the ExportToExcellGeneratedCustomExport interface.

Does the solution meet the goal?

A. Yes

B. No

Correct Answer: B

QUESTION 2

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You are a Dynamics 365 Finance system administrator.

Users report that purchase order numbers are being generated in a non-continuous configuration during bulk purchase order creation.

You need to determine how to improve performance.

Solution: Enable Preallocation for the purchase order number sequence.

Does the solution meet the goal?

A. Yes

B. No

Correct Answer: A

QUESTION 3

You are a Dynamics 365 for Finance and Operations system administrator.

You use Lifecycle Services (LCS) for your deployment. The company currently has multiple methodologies assigned to various projects. One methodology is incorrectly assigned and must be changed.

You need to change the methodology on an existing project.

Which two options can you use? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

A. Change methodology

B. Project settings

C. Manage methodologies

D. Edit methodology

Correct Answer: AC

QUESTION 4

You are employed as a system administrator for your company\\'s Dynamics 365 Finance system.

You developed a work flow in your testing environment. However, when you move the workflow to the production environment, the workflow enters a wait state.

You have to get the workflow out of the wait state.

Which of the following actions should you take?

A. Configure the workflow as critical job.

B. Configure work item queues.

C. Configure users for the workflow system.

D. Configure the workflow execution account.

Correct Answer: D

QUESTION 5

You are a Dynamics 365 for Finance and Operations system administrator.

A user reports that the system is getting gradually slower.

You need to identify the user\\'s processes and slow-running queries and rebuild any fragmented indexes.

Which features should you use? To answer, select the appropriate configuration in the answer area.

NOTE: Each correct selection is worth one point.

Hot Area:

Instruct the user to validate the processes using a given session ID	
	User interaction
	User load
	Activity load
	User activity

View the call stack for any slow-running queries	
	User interaction
	Raw logs
	Activity load
	User load

Rebuild a fragmented index	
	SQL insights
	Environment activity
	Environment health
	User load

Correct Answer:

Instruct the user to validate the processes using a given session ID

User interaction
User load
Activity load
User activity

View the call stack for any slow-running queries

User interaction
Raw logs
Activity load
User load

Rebuild a fragmented index

SQL insights
Environment activity
Environment health
User load
