**QUESTION 1**

**HOTSPOT**

You are the production scheduler at a manufacturing company. You schedule estimated production orders and ensure that capacity is used efficiently.

You have an order that must be scheduled at the resource group level and scheduled backward from the delivery date specified on the production order.

You need to schedule the order.

Which scheduling parameters should you use? To answer, select the appropriate option in the answer area.

NOTE: Each correct selection is worth one point.

### QUESTION 2

A company produces and distributes seafood to supermarkets. During the manufacturing process, raw seafood is purchased, cleaned, and packaged into various-sized boxes. Each box may have a different weight.

Product is sold by the box and priced by the pound.

You need to ensure that you can perform transactions at the box level and record the net weight of goods shipped to a customer.

Solution: Set up a unit sequence group on the item for both pounds and boxes, then set a standard unit conversion for the product from box to pounds.

Does the solution meet the goal?

- A. Yes
- B. No

Correct Answer: B

### QUESTION 3

#### QUESTION 4

You work for a gem wholesaler that sells raw diamonds. Diamonds are purchased and sold in individual boxes but weighed and inventoried in carats.

You are setting up a catch weight item for diamonds. Each box of diamonds must be tracked by its individual container weight.

You need to set up this item as a full visibility catch weight item. Which two steps must you perform? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. Assign it a Serial number group with per qty. defined as 1.
- B. Assign the item a Tracking dimension group with active serial number control.
- C. Create an inter-class unit of measure conversion between boxes and carats.
- D. Assign a Tracking dimension group with batch number as the only active tracking dimension.

Correct Answer: BC

#### QUESTION 5

A configure-to-order company is implementing Dynamics 365 for Finance and Operations. The company is preparing to use the product configuration model functionality to develop the Bill of materials (BOM), routes and valid configuration combinations.

You need to set up the configuration models, constraints, and pricing.

In which order should you perform the actions? To answer, move all actions from the list of actions to the answer area and arrange them in the correct order.

Select and Place:

| Actions  | Answer Area |
|--|-------------|
| Create attribute types and add them to the configuration model.                |             |
| Set pricing model criteria to configuration model.                             |             |
| Add BOM lines, route operations, and the pricing model to configuration model. |             |
| Add version to configuration model.  |             |
| Add constraints to configuration model.  |             |

Correct Answer:

| Actions | Answer Area  |
|---------|--|
|         | Create attribute types and add them to the configuration model.                |
|         | Add constraints to configuration model.  |
|         | Add BOM lines, route operations, and the pricing model to configuration model. |
|         | Add version to configuration model.  |
|         | Set pricing model criteria to configuration model.                             |
