QUESTION 1

SIMULATION

You are a functional consultant for a company named Contoso Entertainment System USA (USMF).

You need to regenerate a master plan named DynPlan for item number D0023.

To complete this task, sign in to Dynamics 365 portal.

Correct Answer: See explanation below.

You specify the planning method in the Master planning run dialog box. To open this dialog box, go to Master planning > Master planning > Run > Master planning, or select Run in the Master planning workspace.

Regeneration

The regeneration planning method deletes existing planned orders, unless they are firmed. It generates new planned orders, based on all the requirements. Regeneration is the only planning method that is available for static plans.

1.

Changes in supply are considered. These changes include changes in the forecast.

2.

This method respects the Period coverage code.

3.

This method supports product substitution functionality (PI).

Select DynPlan in the Master Plan field.

Select Regeneration in the Planning Method field.

Enter D0023 in the Item Number field.

QUESTION 2

Your company makes use of a Dynamics 365 Supply Chain Management system.

You are tasked with amending inventory. Additionally, the existing item posting configuration must be overridden.

You make use of the inventory adjustment journal.

Does the action achieve your objective?

A. Yes, it does

B. No, it does not

Correct Answer: B

Reference: <https://docs.microsoft.com/en-us/dynamics365/supply-chain/inventory/inventory-journals>

QUESTION 3

A company has revenue items that generate high, medium, or low revenue. You need to configure ABC classifications as follows:

Item type	Classification
High revenue	A
Medium revenue	B
Low revenue	C

Which two actions should you perform? Each correct answer presents part of the solution. NOTE: Each correct selection is worth one point.

- A. Define highest, middle, and lowest ABC values as percentages
- B. Define highest, middle, and lowest ABC values as amounts
- C. Select ABC model of revenue
- D. Define internal interest in percentage
- E. Select ABC model of value

Correct Answer: AC

QUESTION 4

A company uses Planning Optimization. The company uses the product lifecycle state setup to exclude some items from planning. Items may exist in more than one warehouse.

What configuration is required so that Planning Optimization excludes these items?

Select only one answer.

- A. Planning Optimization will respect the lifecycle state if it is enabled from Lifecycle Services.
- B. The items will respect the lifecycle state if manual planning on the warehouse setup is set to No.
- C. The items will respect the lifecycle state if manual planning on the warehouse setup is set to Yes.
- D. The product lifecycle state must be set up on the items only.
- E. Planning Optimization will respect the lifecycle state if it is enabled from Feature management.

Correct Answer: B

QUESTION 5

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while

others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

A company is implementing inventory management in Dynamics 365 Supply Chain Management.

The company needs to block inventory and ensure that physical inventory will not be reserved by other outbound transactions.

You need to select the appropriate option to block the inventory in the system.

Solution: Manually create a transaction on the inventory blocking page.

Does the solution meet the goal?

A. Yes

B. No

Correct Answer: A
