QUESTION 1

A company has items in inventory with two costing methods: FIFO and Standard. The company needs to calculate the cost of all items at month end and provide a total inventory value to the finance department.

You need to determine the total value of inventory.

Which costing method requires running the inventory close?

- A. FIFO and Standard Cost items
- B. FIFO items only
- C. LIFO, Moving Average, and Date Weighted Average items
- D. Standard Cost items only

Correct Answer: B

QUESTION 2

You need to configure the system to support the pottery product line. What should you do first?

- A. Create a new product with storage dimensions.
- B. Create a new product master with predefined product variants.
- C. Create a new product with locking dimensions.
- D. Set up a new product with product configuration.

Correct Answer: B

QUESTION 3

HOTSPOT

A company implements Dynamics 365 Supply Chain Management.

You complete the prerequisites to implement the master planning optimization.

You need to configure the planning optimization feature.

What should you do? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Hot Area:

Answer Area

Requirement

Action

Ensure that existing planning jobs fail to process.

	▼
	Enable the Use planning optimization option when the planning optimization service is connected.
	Enable the Use planning optimization option when the planning optimization service is disconnected.
	Disable the Use planning optimization option when the planning optimization service is connected.
	Disable the Use planning optimization option when the planning optimization service is disconnected.

Use the default planning optimization engine.

	▼
	Enable the Use planning optimization option when the planning optimization service is connected.
	Enable the Use planning optimization option when the planning optimization service is disconnected.
	Disable the Use planning optimization option when the planning optimization service is connected.
	Disable the Use planning optimization option when the planning optimization service is disconnected.

Correct Answer:

Answer Area

Requirement

Action

Ensure that existing planning jobs fail to process.

- Enable the Use planning optimization option when the planning optimization service is connected.
- Enable the Use planning optimization option when the planning optimization service is disconnected.
- Disable the Use planning optimization option when the planning optimization service is connected.
- Disable the Use planning optimization option when the planning optimization service is disconnected.

Use the default planning optimization engine.

- Enable the Use planning optimization option when the planning optimization service is connected.
- Enable the Use planning optimization option when the planning optimization service is disconnected.
- Disable the Use planning optimization option when the planning optimization service is connected.
- Disable the Use planning optimization option when the planning optimization service is disconnected.

QUESTION 4

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

A company uses Dynamics 365 Supply Chain Management to manage item returns.

You need to ensure that the original quantity and price from a sales order is used for return order.

Solution: Create a margin alert.

Does the solution meet the goal?

A. Yes

B. No

Correct Answer: B

Reference: <https://docs.microsoft.com/en-us/dynamics365/supply-chain/service-management/return-cost-price-and-return-lot-id>

QUESTION 5

DRAG DROP

A company distributes products. The company produces some of the products it distributes.

The company needs to move from manual to automatic inventory reservations.

You need to set up automatic reservations.

Which parameters should you select?

To answer, drag the appropriate parameters to the correct reservation policies. Each parameter may be used once, more than once, or not at all.

You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Select and Place:

Item Model Group	Reserve items automatically for sales Parameter type
Inventory and Warehouse Management	Reserve items automatically for transfers Parameter type
Production	Reserve items when work is scheduled Parameter type

Correct Answer:

The screenshot shows a SAP configuration screen for reservation settings. On the left, there are three empty input fields. On the right, there are three sections, each with a corresponding button:

- Reserve items automatically for sales**: Inventory and Warehouse Management
- Reserve items automatically for transfers**: Item Model Group
- Reserve items when work is scheduled**: Production
