QUESTION 2

HOTSPOT

A company is implementing the vendor collaboration functionality in Dynamics 365 Chain Management.

A vendor's external user must be able to access the vendor portal and create new users. The external user must be able to create new users only for the vendor's organization.

You need to set up the solution to meet the requirements.

How should you set up the solution? To answer, select the appropriate options in the answer area.

Hot Area:

Allow portal access for vendor users.

	▼
Grant full Azure Active Directory access	
Create employee records	
Create new worker records	
Provision the vendor users	

Grant access to create new users.

	▼
Initiate a workflow	
Grant full Azure Active Directory access	
Configure rules to enforce separation of duties	
Assign the contacts to the vendor	

Correct Answer:

Allow portal access for vendor users.

	▼
Grant full Azure Active Directory access	
Create employee records	
Create new worker records	
Provision the vendor users	

Grant access to create new users.

	▼
Initiate a workflow	
Grant full Azure Active Directory access	
Configure rules to enforce separation of duties	
Assign the contacts to the vendor	

Box 1: Provision the vendor users

Box 2: Initiate a workflow

Set up workflows to process vendor collaboration user requests To help guarantee that all the relevant tasks are completed, and that the appropriate approvals are given, you must set up workflows to handle vendor collaboration user

requests.

Vendor collaboration user requests are submitted either by external vendors that have the Vendor admin (external) security role or similar permissions, or by procurement professionals in your company. They can also be generated from

prospective vendor registration requests during the vendor onboarding process.

There are three types of requests:

Requests to provision a new user

Requests to inactivate an existing user

Requests to modify the security roles of an existing user

You must create two or more workflows to process all three types of vendor collaboration user requests.

A client is implementing Dynamics 365 Finance.

You need to determine a testing solution to validate performance of critical business processes in the organization.

Which two tools should you use? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. Task Recorder
- B. SysTest
- C. PerfSDK
- D. Regression suite automation tool

Correct Answer: AC

QUESTION 5

You need to recommend a solution for the chief technical officer (CTO) What should you recommend?

- A. Premier Support
- B. Azure Rapid Response
- C. Proactive Services
- D. Lifecycle services (LCS)
- E. Azure DevOps

Correct Answer: A

Microsoft Dynamics customers who enroll in Microsoft Services Premier Support have access to complete, end-to-end vendor services for the entire Microsoft environment-from databases and desktops to servers and business applications.

Microsoft Premier Online is a secured online resource, exclusively available to Premier Support and Essential Support customers. It provides a comprehensive repository of support and other resources to help you and your IT teams stay upto-date and knowledgeable about the Microsoft technologies you use every day. Continue to use CustomerSource to access unlimited online training, the support Knowledge Base, and upgrades, updates, service packs, hot fixes and tax and

regulatory updates for Microsoft Dynamics.

Note: The CTO has directed the infrastructure team to guarantee they are on the most current version available at the time of go-live.

The CTO has learned that there are updates to globalization features in Dynamics 365 Finance. The IT staff has been tasked with ensuring that they are the first group to receive these updates.

The IT department has limited knowledge of Microsoft 365, Microsoft Teams, and Dynamics 365 Finance. The IT department will be unable to support the applications. The CTO must determine the strategy for managing the support-related

risk.
