QUESTION 5

A distribution company uses Dynamics 365 Supply Chain Management.

The company has one buyer group for paper products and another buyer group for chemicals. Each buyer group purchases from separate vendors.

The buyers print individual purchase order confirmations to PDF files and then send the PDF files to their desktop printer.

The company purchases two network printers. Each buyer group receives one printer.

Each buyer group must send PDF files to their own printer.

You need to configure Dynamics 365 Supply Chain Management to support the requirement.

Which two features should you configure? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. Document Routing Agent
- B. Power Automate
- C. Print management
- D. Electronic reporting tool
- E. Power BI

Correct Answer: AC

A: Install the Document Routing Agent to enable network printing. The Document Routing Agent is a downloadable application that you can use to enable network printing scenarios. You can enable network printers for specific companies by using in-client administrative pages.

C: Print management is the framework in Dynamics 365 Finance and Operations that allows users to configure print settings for various business documents, including sending emails and archiving. Print management setups are typically separated by module and include nodes for all business documents that are available to be printed.
