QUESTION 1

You have several forms that use a table named Customers as a data source to display information about your customers.

You need to maintain all of the fields that relate to a customer\\'s address information. You also need the ability to add fields in the future, such as Address 2 or Address 3, and have them dynamically be shown on your forms once they are

added to the table.

What should you create on the table, so it can populate the correct fields on the final form?

A. a relationship to another table

B. a field group containing all of the "address related" fields

C. a table collection

D. an index to organize the data

Correct Answer: C

QUESTION 2

You need to ensure that the custom roles that are created for your company comply with the segregation of duties. What are three possible ways to achieve this goal? Each correct answer presents a complete solution.
