## QUESTION 1

You are writing a method to create a new Customer group. You begin by writing the following code:

```
class ExampleClass
{
    /// <summary>
    ///     Create a new customer group
    /// </summary>
    /// <param name = "_custGroup">
    ///     Customer group to create
    /// </param>
    ///<param name = "_name">
    ///     Description for customer group
    /// </param>
    Public static void createCustGroup (CustGroupId _custGroup, Description _name)
    {
        CustGroup custGroup;

        ttsbegin;
        custGroup.CustGroup=_custGroup;
        custGroup.Name=_name;

        ///TODO: save custgroup record to database

        ttscommit ;
    }
}
```

You need to complete the method.

With which statement should you replace the TODO comment line to accomplish this goal?

- A. `custGroup.insert();`
- B. `RecordInsertList.add(custGroup);`
- C. `insert_recordset custGroup (CustGroup,Name);`

D. `custGroup.merge()`;

Correct Answer: A

---

## QUESTION 2

You are writing an X++ method.

You need to perform the same logic for multiple records in the database.

How should you iterate over multiple records in X++?

- A. Declare an enumerator for the table, and call the `moveNext()` method to read each record.
- B. Declare a `RecordSortedList` variable for the table, and use the `next()` method to read each record.
- C. Declare a table buffer variable, and then write a "while select" statement to iterate through each record.
- D. Declare a shared variable for the table, and use the `next()` method to read each record.

Correct Answer: C

Reference: <https://docs.microsoft.com/en-us/dynamics365/unified-operations/dev-itpro/dev-ref/xpp-data-query#while-select-statements>

---

## QUESTION 3

You are an Independent Software Vendor (ISV) developer and are creating a new form for an existing solution.

Business requirements state that the form must always open in a grid view.

What should you modify to fulfill this requirement?

- A. the Open Mode property on the form's menu item
- B. the Window Type property on the form's design
- C. the Form View Option property on the form's menu item
- D. the View Edit Mode property on the form's design

Correct Answer: C

---

## QUESTION 4

You manage package deployments for a Microsoft Dynamics 365 Retail environment, and you need to determine if a package rebuild is necessary. Which scenario requires a package rebuild?

- A. You cannot set the Synchronize database on the Build Property to True.
- B. You want to re-run a build due to warnings that appear in the Error List pane concerning best practices.

- C. You want to build dependent and reference models at the same time.
- D. You want to force a build of all objects, regardless of whether they have changed.

Correct Answer: D

---

#### QUESTION 5

You are developing a Fleet management module for Microsoft Dynamics 365 Finance and Operations.

You create an FMVehicle table to store information that is specific to each vehicle in your fleet.

Now, you need to create a form that allows users to view and edit all of the information related to a vehicle.

Which form pattern should you use to accomplish this goal?

- A. List Page
- B. Dialog - Basic
- C. Workspace Operational
- D. Details Master

Correct Answer: D
