Values	Answer Area
Get-ManagementRole	\$Perms = Get-ManagementRoleEntry -Cmdlet Dismount-Database
	<pre>\$Perms   foreach { Get-ManagementRoleAssignment   -Role \$Name -Delegating   \$false   Format-Table</pre>
	-Auto Role, RoleAssigneeType, RoleAssigneeName}
Get-ManagementScope	

**Answer Area** 

### Correct Answer:

# From the Azure Active Directory admin center, delete the account of User1. From the Azure Active Directory admin center, disable the account of User1. From the Microsoft 365 admin center, remove the license from User1. From the Security & Compliance admin center, place the mailbox of User1 on In-Place Hold. From the Exchange admin center, delete the mailbox of User1. From the Exchange admin center, grant Manager1 the Full Access permission to the mailbox of User1. From the Exchange admin center, convert the mailbox of User1 into a shared mailbox.

### **QUESTION 3**

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while

others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a Microsoft Exchange Server 2019 hybrid deployment. All user mailboxes are hosted in Microsoft 365. All outbound SMTP email is routed through the on-premises Exchange organization.

A corporate security policy requires that you must prevent credit card numbers from being sent to internet recipients by using email.

4/6

2024 Latest pass2lead MS-203 PDF and VCE dumps Download

You need to configure the deployment to meet the security policy requirement.

Solution: From the Exchange organization, you modify the properties of the Send connectors.

Does this meet the goal?

A. Yes

B. No

Correct Answer: B

You should create a Data Loss Prevention (DLP) policy.

### **QUESTION 4**

You have a Microsoft Exchange Online tenant that uses an email domain named @contoso.com.

You recently purchased an email domain named fabrikam.com.

You need to ensure that all the users in the tenant can receive email messages by using the @fabrikam.com email domain. The solution must ensure that the users can continue to receive email by using the @contoso.com email domain.

Which two actions should you perform? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. From the Microsoft 365 admin center, add the fabrikam.com email domain.
- B. From the Exchange admin center, add an accepted domain for fabrikam.com.
- C. From the Microsoft 365 admin center, modify the organization profile.
- D. From the Exchange admin center, add a remote domain for fabrikam.com.
- E. From the Exchange Management Shell, create a script that runs the Set-Mailbox cmdlet.

Correct Answer: AE

A: the first step is to add the Fabrikam.com domain to Microsoft 365. You would also need to verify the domain (verify that you own the domain).

E: create a script that runs the Set-Mailbox cmdlet to add an @fabrikam.com email address to each mailbox.

### **QUESTION 5**

You have a Microsoft Exchange Server 2019 organization. You need to import an Edge Subscription on a Mailbox server. Which cmdlet should you run?

- A. New-EdgeSubscription
- B. Start-EdgeSynchronization

https://www.pass2lead.com/ms-203.html 2024 Latest pass2lead MS-203 PDF and VCE dumps Download

C. Set-EdgeSubscription

D. Set-TransportAgent

Correct Answer: A
