QUESTION 4

You have a Microsoft 365 E5 subscription that contains the users shown in the following table.

Name	Member of	Azure Multi-Factor Authentication (Azure MFA)
User1	Group1	None
User2	Group1	User authenticates by using a text message.
User3	Group1	User authenticates by using the Microsoft Authenticator app.
User4	Group1	User authenticates by using passwordless authentication.

You enable the authentication methods registration campaign and configure the Microsoft Authenticator method for Group1.

Which users will be prompted to configure authentication during sign in?

A. User1 only

B. User2 only

C. User2 and User3 only

D. User1 and User2 only

E. User2 and User3 only

F. User1, User2, and User3 only

Correct Answer: D

You can nudge users to set up Microsoft Authenticator during sign-in. Users will go through their regular sign-in, perform multifactor authentication as usual, and then be prompted to set up Microsoft Authenticator. You can include or exclude

users or groups to control who gets nudged to set up the app. This allows targeted campaigns to move users from less secure authentication methods to Microsoft Authenticator.

Incorrect:

Not C, Not E, Not F: Not User3 since the user must not have already set up Microsoft Authenticator for push notifications on their account.
