#### QUESTION 1

A technician is installing an 802.11n network. The technician is using a laptop that can connect at a maximum speed of 11 Mbps. The technician has configured the 802.11n network correctly but thinks it could be the type of WLAN card used on the laptop. Which of the following wireless standards is the WLAN card MOST likely using?

- A. 802.11a
- B. 802.11b
- C. 802.11g
- D. 802.11n

Correct Answer: B

---

#### QUESTION 2

At which of the following layers of the OSI model do packets exist?

- A. Network
- B. Session
- C. Data link
- D. Transport

Correct Answer: A

---

#### QUESTION 3

A user connects to a wireless network at the office and is able to access unfamiliar SMB shares and printers. Which of the following has happened to the user?

- A. The user is connected using the wrong channel.
- B. The user is connected to the wrong SSID.
- C. The user is experiencing an EMI issue.
- D. The user is connected to the wrong RADIUS server.

Correct Answer: B

The user is connecting to an SSID assigned to a different subnet. Therefore, the user has access to SMB shares and printers that are not recognizable.

---

#### QUESTION 4

An administrator would like to decrease the load time of common websites that employees review daily. Which of the following can be installed?

- A. Load balancing
- B. VPN concentrator
- C. Caching server
- D. Fault tolerance

Correct Answer: C

---

#### QUESTION 5

A network administrator receives a call that a user cannot access the Internet. Upon troubleshooting, the administrator finds the user has a dynamic IP address that is not in the same subnet as the company's network. Which of the following is the MOST effective hardening technique the administrator should use?

- A. DHCP snooping
- B. IPSec
- C. MAC address filtering
- D. ARP inspection

Correct Answer: D
