QUESTION 1

Which of the following is the prefix for a link-local IPv6 address?

- A. FE80::/10
- B. FF00::/8
- C. 2FFE::/16
- D. FEEF:/12

Correct Answer: A

QUESTION 2

While installing new network equipment, a network administrator wants to add infrastructure to keep the cables organized in the environment. The administrator also needs cables to be easily removed or added due to the constantly changing environment. Which of the following will BEST fulfill the requirement?

- A. Hook and loop straps
- B. Ladder trays
- C. Raised floor
- D. Cable ties

Correct Answer: B

https://en.wikipedia.org/wiki/Cable_tray#Types

QUESTION 3

A service provider is unable to maintain connectivity to several remote sites at predetermined speeds. The service provider could be in violation of the:

- A. MLA.
- B. SLA.
- C. SOW.
- D. MOU.

Correct Answer: B

SLA stands for Service Level Agreement. This is a common document in business used to define a minimum standard of service that a customer can expect from a supplier. SLA's are particularly common in the I.T. sector where a service provider is offering a service to a customer. As a customer, you want your hosted services and Internet or WAN connections to be available all the time. SLAs often guarantee 99.9% uptime for a service. In this question, the service

provider is providing WAN links to remote sites with a guaranteed bandwidth on the WAN links. A failure to maintain the connectivity to the remote sites would be a violation of the Service Level Agreement (SLA).

QUESTION 4

Which of the following is the MOST economical way for Sandy, a technician, to implement 10- Gigabit Ethernet at a datacenter?

- A. 10GBaseLR
- B. 10GBaseSR
- C. 10GBaseX
- D. 10GBaseT

Correct Answer: D

QUESTION 5

Which of the following is considered a classless routing protocol?

- A. IGRP
- B. IS-IS
- C. RIPv1
- D. STP

Correct Answer: B
