QUESTION 1

Click the Exhibit button.

```
destination_cluster::> snapmirror policy create -vserver dvs1 -policy exclude_LIF -type async-mirror -discard-configs network

destination_cluster::> snapmirror create -source-path vs1: -destination-path dvs1: -type DP -throttle unlimited -policy exclude_LIF -schedule hourly -identity-preserve true

destination_cluster::> snapmirror show
                                                     Progress
Source             Destination  Mirror        Relationship  Total             Last
Path        Type   Path         State         Status        Progress  Healthy Updated
----------- ----   ------------ ------------- ------------- --------- ------- --------
vs1:        DP     dvs1:        Snapmirrored  Idle          -         true    -
```

The source SVM vs1 has 50 CIFS shares, 100 NFS export policies, and four data LIFs.

Referring to the SVM disaster recovery output shown in the exhibit, which two statements are true? (Choose two.)

A. CIFS shares and NFS export policies are not migrated from the source to the destination.

B. LIFs are not migrated from the source to the destination.

C. CIFS shares and NFS export policies are migrated from the source to the destination.

D. LIFs are migrated from the source to the destination.

Correct Answer: BD

QUESTION 2

A user cannot delete the files in a volume\\'s Snapshot copy. In this scenario, what is the problem?

A. A retention period was configured for the Snapshot copy.

B. Snapshot copies are read only.

C. The files are being used by another user.

D. The user does not have the required permission.

Correct Answer: B

QUESTION 3

You relocate an aggregate to a different node by using the storage aggregate relocate command. In this scenario, which rule applies?

A. You can only relocate an aggregate that is not assigned to a specific SVM.

B. You must first break the relationship to move an aggregate that hosts a replication destination.

C. You can only relocate an aggregate to the HA partner node.

D. You cannot relocate an aggregate that is hosting a FlexGroup constituent volume.

Correct Answer: C

QUESTION 4

You want to configure Active Directory authentication for a cluster. You have performed the following actions:

-created the SVM,

-joined the SVM to Active Directory,

-

created the domain tunnel.

You attempt to log in to the cluster as an Active Directory user but access is denied.

How would you solve this problem?

A.

Create a custom role that allow Active Directory tunneling.

B.

Create a cluster user account with the same username and password as the Active Directory user.

C.

Create an Active Directory user account on the cluster.

D.

Create a cluster user account within Active Directory.

Correct Answer: C

QUESTION 5

Click the Exhibit button.

```
::> storage failover show
                  Takeover
Node    Partner  Possible   State Description
------  -------  ---------  ------------------
node1   node2    -          Waiting for giveback
node2   node1    false      In takeover.
node3   node4    -          Waiting for giveback
node4   node3    false      In takeover, Auto giveback will be
initiated in 30 seconds
```

Your 4-node cluster has two controllers in takeover as shown in the exhibit. Which action must be performed to ensure a giveback occurs on both nodes?

A. Perform a giveback of node1.

B. Perform a giveback of node4.

C. Perform a giveback of node3.

D. Perform a giveback of node2.

Correct Answer: B
