QUESTION 1

A FAS8200 system fails to boot because of a corrupted image on the boot media. Which action would be performed to solve this problem?

A. Copy the boot image from the root volume of the node.

B. Download a network image using the netboot procedure.

C. Use the boot_recovery command from the LOADER prompt.

D. Execute the boot_primary command at the loader.

Correct Answer: D

SAS Expander master module: 1
```

Using the data shown in the exhibit, which two parts would you recommend replacing? (Choose two.)

A. PSU2

B. I/O module (IOM) 1

C. PSU1

D. I/O module (IOM) 2

Correct Answer: CD

```

On a ONTAP system, CLI commands for adding an initiator to an igroup on csiptc-2240-10 are failing, even when attempted several times on node csiptc-2440-10. However, the command works on node 09. You can create a volume on both nodes.

![Pass2Lead](https://Pass2Lead.com)
Referring to the exhibit, which two statements are true? (Choose two.)

A. vldb is functioning on both nodes.

B. The igroup cannot be created because the vigmgr is secondary on 10.

C. bcomd is causing the commands to fail.

D. mgmt is failing the operation.

Correct Answer: AD

QUESTION 4

A customer has added a new user account, "jsmith", on a UNIX NFS client using the /etc/passwd file on that client. The NFS client has a mount, "/mountpoint", to an NTFS security style volume from an ONTAP SVM using NFSv3. The user "jsmith" does not exist in the Windows domain. The user "jsmith" must be able to access this mount, but cannot. According to company security policy, the customer cannot add the user "jsmith" to the Active Directory configuration.

Which two actions will solve the problem? (Choose two.)

A. Enable default Windows users for unknown UNIX users.

B. From the UNIX client, use the chown -R jsmith command /mountpoint.

C. Add the user to the /etc/passwd file on the storage controller.

D. Configure the default Windows user to allow access to the proper SMB data.

Correct Answer: BD

QUESTION 5

You are provisioning a LUN for a server running Windows Server 2016.

In this scenario, which ONTAP LUN OS type should you use?

A. hyper_v

B. windows

C. windows_2008

D. windows_gpt

Correct Answer: B
